PART C

SCHEDULE C1 SIGNIFICANT SITES FOR TANGATA WHENUA

Marae

NO.	ITEM	IWI AFFILIATION
M1	Parewahawaha Marae Domain Road, Bulls	Ngati Raukawa, Ngati Parewahawaha
M2	Tini Waitara Marae Turakina Beach Road, Turakina	Ngati Apa (Nga Ariki, Ngati Rangipuhi, Ngati Kiriweheke)
M3	Whangaehu Marae Whangaehu Beach Road, Whangaehu	Ngati Apa (Ngati Rangiwahakaturia, Ngati Tumataikura Ngati Tamaea, Ngati Kiriweheke)
M4	O Tahuhu Marae Taraketi Road, Rata	Ngati Hauiti (Ngati Haukaha)
M5	Rata Marae (Potaka Marae) Te Hou Hou Road, Rata	Ngati Hauiti (Ngati Tamateraka)
M6	Kauangaroa Marae & Kohutu Waka monument stone Kauangaroa Road, Kauangaroa	Ngati Apa (Nga Wairiki, Ngati Huru)
M7	Te Kapua Marae Kumuiti Road, Kauangaroa	Ngati Apa (Nga Wairiki)
M8	Kahurauponga Turakina Beach Road, Turakina	Ngati Apa (Nga Wairiki) Ngati Tupataua
M9	Tautahi Marae (Winiata Marae) State Highway 1, Winiata	Ngati Kahungunu, Ngati Hinemanu, Ngati Paki
M10	Rakatapauma Marae Maukuku Road, Irirangi	Ngati Rangituhia
M11	Tamakopiri Marae (Opaea Marae) Spooners Hill Road, Opaea	Ngati Tamakopiri
M12	Whitikaupaka Marae Te Moehau Road, Moawhango	Ngati Whitikaupaka
M13	Oruamatua Marae (Moawhango Marae) Wherewhere Road, Moawhango	Ngati Kahungunu, Ngati Whiti
M14	Nga Hau e Wha Marae Nga Tawa Rd, Marton	Ngati Apa
M15	Parewanui Marae Grounds Parewanui Road, Bulls	Ngati Apa, Ngati Kauae, Ngati Tauira
M16	Ratana Pa Ratana Road, Ratana	Ratana Community

Wahi Tupuna

NO.	ITEM	IWI AFFILIATION
M17	Te Aputa~Upper Kawhatau Valley	Ngati Hauiti
M18	Otoea~ Confluence of Hautapu and Rangitikei Rivers	Ngati Hauiti
M19	Otara~Upstream of Ohingaiti	Ngati Hauiti
M20	Rata~Te Hou Hou Road	Ngati Hauiti
M21	Parae Karetu (Mount Curl)	Ngati Apa
M22	Putorino	Ngati Apa

~ Ngati Hauiti have requested that an area of 3km around these areas is recognised as having special significance to iwi.

SCHEDULE C2 NOTABLE TREES

REF	LOCATION	SPECIES
T1	Bulls Cenotaph E2713248 N6111987	Northern rata
T2	Marton Primary School, Marton E2713067 N6123382 and E2713074 N6123384	Elm
T3	Marton Park, Marton E2712788 N6123929	English oak
T4	Marton Park, Marton E2712724 N6123906	English oak
T5	Marton Park, Marton E2712782 N6123929	English oak
T6	Letheney, Bulls E2713174 N6112326	English beech
T7	Westoe, Bulls E2717116 N6118815	Umbrella pine
T8	Westoe, Bulls E2717126 N6118756	Norfolk Island pine
T9	Westoe, Bulls E2717135 N6118720	Cedar of Lebanon
T10	Westoe, Bulls E2717118 N6118666	Douglas fir
T11	Westoe, Bulls E2717091 N6118672	Norfolk Island pine
T12	Westoe, Bulls E2717135 N6118496	Redwood
T13	Westoe, Bulls E2717136 N6118503	Redwood
T14	Westoe, Bulls E2717166 N6118542	Dawn redwood
T15	Calico Line, Marton E2716210 N6123360	Messmate
T16	Pukepapa St, Marton E2712207 N6123209	Bunya pine
T17	Aldsworth Rd, Silverhope E2725589 N6134806	English oak
T18	Aldsworth Rd, Silverhope E2725483 N6135145	English oak
T19	Memorial Park, Taihape E2750303 N6166010	Redwood
T20	Recreation Reserve, Taihape Adjacent to shearing sheds E2750623 N6165810	Mixed species treeland
T21	Recreation Reserve, Taihape Between No. 3 field and native bush E2750610 N6165915	Redwood treeland
T22	Recreation Reserve, Taihape Behind the No. 2 field E2750523 N6166039	Redwood belt

SCHEDULE C3A HISTORIC HERITAGE

NO.	ITEM	MAP NO.
H1	Makohine Railway Viaduct <i>Ironworks Road, Ohingaiti</i>	18
H2	Merchiston Station Homestead <i>Putorino Road, Rata</i>	4
H3	Westoe Homestead <i>Kakariki Road, Kakariki</i>	4
H4	Merchiston Station Homestead Fountain <i>Putorino Road, Rata</i>	4

H51	Memorial to Bess <i>Forest Road, Bulls</i>	2
H52	St Mary's Church <i>53 Huia Street, Taihape</i>	15
H53	Flock House Homestead and McKelvie Flagpole <i>Parewanui Road, Parewanui</i>	2
H54	Marton Park Historic Area <i>Follett Street, Marton</i>	20
H55	Parewanui Presbyterian Cemetery <i>Dalrymple Road, Bulls</i>	2
H56	McManaway's Pataka and Waka <i>Te Houhou Road, McManaway's Farm, Rata</i>	4
H57	Te Aputa Pa <i>Near Mangakukeke Road and Upper Kawhatau Road</i>	9
H58	Brandon Hall Homestead <i>Brandon Hall Road, RD 1, Bulls</i>	22
H59	Arahina Historic Area (former Girl Guide Centre) <i>457-459 Wellington Road, Marton</i>	21
H60	Korihirau Pa and Omanono Pa (Rihirau) <i>Otara Road, Ohingaiti</i>	18
H61	North Island Main Trunk (NIMT) Historic Area <i>Makohine Viaduct to Taumarunui Railway Station, North Island Main Trunk, Makohine; Taumarunui</i>	7, 14, 15, 16, 17, 8, 6

Note: The sites in Schedule C3A identify general values only. The Heritage New Zealand registration report and/or NZAA site record contain these specific values and delineated area for which protection is sought.

SCHEDULE C3B HERITAGE VALUES

The building listed in Schedule C3B, due to their being of a similar period, scale, height, style and use of materials, collectively provide a homogenous built form to the town, and in combination provide the architectural character of Marton's Heritage Precinct.

Information presented in Schedule C3B is derived from a 2014 heritage value assessment and evaluation exercise undertaken by Ian Bowman, architect and conservator, of statutorily recognised buildings within Marton's town centre. This exercise was based upon research supplied by Heritage New Zealand and Rangitikei District Council into the physical and social history of each building and an outline description of the buildings, and visual inspections of each building's exterior (usually limited to just the street facade). As such, the architectural values of the remainder of the buildings (e.g. roof, sides, and interior) were not assessed or evaluated. Rangitikei District Council holds individual reports on each of the 16 buildings listed.

NO.	BUILDING NAME AND ADDRESS	HNZ LISTING	SIGNIFICANCE	PHYSICAL VALUES	HISTORIC & CULTURAL VALUES
H7	Former Court House 23 High Street	Category 1	High national significance	<ul style="list-style-type: none"> brickwork elevations facade –cement rendered decorative elements including pediment, cornice, balled finials, pilasters, window architraves, sill course, swags timber door and window joinery chimneys rear elevation roof 	<p>Distinctive Marton building with unique architectural styling.</p> <p>Rare example of small building in the Edwardian Baroque style.</p> <p>Example of government architect John Campbell's work.</p>
H18	Abraham and Williams 304-310 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> exposed brickwork piers, walls, parapet rendered parapet, cornices, pediments, window heads jambs, sills and architraves, scroll brackets, shield decorative elements timber joinery and flagpole veranda and supports 	Example of local architect WT Higgin's work.
H19	Advocate Building 26-28 High Street	Category 2	Moderate local significance	<ul style="list-style-type: none"> brickwork to elevations and entry rendered window and door heads timber double hung sash window metal downpipes rendered entry steps "Advocate" sign over the entry metal vents to the base Rear elevation roof 	The last remaining building associated with the Rangitikei Manawatu region's earliest newspaper.
H20	Club Hotel 17 High Street	Category 2	Moderate local significance	<ul style="list-style-type: none"> brickwork to elevations rendered base, window and door heads and sills, other original decorative elements of cornice, parapet copings, finials, quoins, keystones, swag, lettering, cartouche timber fixed and opening double hung sash window timber panelled doors rendered chimneys and pots rendered entry steps metal vents to the base rear elevation roof 	<p>Good example of Edwardian Free Classical style</p> <p>Prominent landmark due to location, scale and form.</p>

SCHEDULE C3B HERITAGE VALUES continued

NO.	BUILDING NAME AND ADDRESS	HNZ LISTING	SIGNIFICANCE	PHYSICAL VALUES	HISTORIC & CULTURAL VALUES
H21	Cobbler Building 314-318 Broadway	Category 2	High regional significance	<ul style="list-style-type: none"> • brickwork • rough cast cement render • tiled roundels • tiled shopfronts • timber window and door joinery • stained glass • timber framed veranda with metal supports • pressed metal ceilings over shop entries • concrete and brick chimneys • rear elevation • roof • toilet block 	Excellent example of local architect Robin Hood's work Archetypal example of Edwardian Free style Significant landmark due to location, scale and form.
H22	Davenport Building 312 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • rendered brickwork to elevations with balustrading, pediment, window architraves, cornice, end brackets, pilasters, sill course • timber double hung sash window • roof • rear elevation 	Primary contributor to the archaeological character of Marton.
H23	Hannan's Marton Hotel 255-256 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • rendered concrete with decorative elements • steel window joinery • timber window and door joinery • balconies with steel balustrading • brick chimneys • Roof • Rear elevation 	Significant landmark due to location, scale and form
H24	Hilton's Building 286 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • brickwork to elevations • rendered parapet and pediment details, cornice, shield with "1902", window architraves and sill course and door heads and sills, other original decorative elements of cornice, parapet copings, finials, quoins, keystones, swag, lettering, cartouche • timber double hung sash window • timber shopfront • veranda with wrought iron decoration 	Primary contributor to the archaeological character of Marton.

SCHEDULE C3B HERITAGE VALUES continued

NO.	BUILDING NAME AND ADDRESS	HNZ LISTING	SIGNIFICANCE	PHYSICAL VALUES	HISTORIC & CULTURAL VALUES
H25	JJ McDonald Building 256-258 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • cement rendered brickwork • rendered parapet and pediment details, cornice, lettering with "Merchant J J McDonald Tailor and Habit-Maker", window architraves and sill course, pilasters, cornice, string courses and other original decorative elements • timber double hung sash window • tiled and timber shopfronts • steel windows above the veranda • veranda • rear elevation • roof 	Prominent landmark due to location, scale and form.
H27	Rangitikei Floriste 212 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • street and side elevation comprising timber rusticated weatherboard exterior with timber detailing • timber parapet and cornice • timber joinery and shopfront • veranda • chimney • rear elevation • roof 	<p>One of few non-masonry commercial buildings in Marton.</p> <p>Example of several buildings in Marton constructed by Zajonskowski Brothers.</p>
H29	Sash and Door Company 296-302 Broadway	Category 2	Moderate local significance	<ul style="list-style-type: none"> • exposed brickwork piers, walls, parapet • rendered parapet, cornice, pediment, pilaster capitals, central window keystone, "Sash and Door Buildings" and "Estd. 1907" • timber joinery • above veranda windows • veranda and supports • rear elevation • roof 	Example of several buildings in Marton constructed by Zajonskowski Brothers.
H33	Former BNZ 12-14 High Street	Category 2	High local significance	<ul style="list-style-type: none"> • rendered plain and decorative walls • timber doors and toplight • timber fixed, casement and double hung sash windows • chimney pots • metal wall vents • rear elevation • roof 	<p>Well-executed example of the Edwardian Italianate Palazzo</p> <p>Example of local architect Joshua Charlesworth's work.</p>

SCHEDULE C3B HERITAGE VALUES continued

NO.	BUILDING NAME AND ADDRESS	HNZ LISTING	SIGNIFICANCE	PHYSICAL VALUES	HISTORIC & CULTURAL VALUES
H35	Plunket and Ladies' Restroom 27 High Street	Category 2	Moderate local significance	<ul style="list-style-type: none"> • rough-cast render • timber window and door joinery • brick columns Marseille tile roofing • exposed rafter ends • subfloor vents • copper guttering and downpipes • "Marton Rest Room" sign • Rear elevation 	One of only 2 listed Plunket and women's restroom buildings in New Zealand Building opened by Sir Truby King (founder of New Zealand Plunket Society). Still used as a public restroom
H36	Former Granary 3 High Street	Category 2	High local significance	<ul style="list-style-type: none"> • weatherboards • bargeboards • first floor timber joinery and panelled ground floor doors roof • rear elevation 	Earliest surviving building in central Marton Associated with early dignitary and businessman William Tennant
H37	Former Post Office 249-253 Broadway	Category 2	High regional significance	<ul style="list-style-type: none"> • rendered concrete with decorative columns • steel window joinery • signage • clock • balcony with steel balustrading • metal spandrel panels with circular motif 	Excellent example of New Zealand influenced Stripped Classical style, Significant landmark due to location, scale and form.
H38	Former Public Trust 20 High Street	Category 2	Moderate local significance	<ul style="list-style-type: none"> • rendered elevations and detailing timber joinery • timber panelled doors • rendered chimneys and pots • Marseille tile roofing • metal vents to the base 	One of only 5 listed Public Trust buildings in New Zealand Excellent example of the Inter-War Beaux Art style Example of national architects Akins and Mitchell's work.

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

Assessment Factors

ASSESSMENT FACTOR	SCOPE
(a) Natural science factors	<p>These factors relate to the geological, ecological, topographical and natural process components of the natural feature or landscape:</p> <ul style="list-style-type: none"> (a) Representative: the combination of natural components that form the feature or landscape strongly typifies the character of an area. (b) Research and education: all or parts of the feature or landscape are important for natural science research and education. (c) Rarity: the feature or landscape is unique or rare within the district or Region, and few comparable examples exist. (d) Ecosystem functioning: the presence of healthy ecosystems is clearly evident in the feature or landscape.
(b) Aesthetic values	<p>The aesthetic values of a feature or landscape may be associated with:</p> <ul style="list-style-type: none"> (i) Coherence: the patterns of land[^] cover and land[^] use are largely in harmony with the underlying natural pattern of landform and there are no, or few, discordant elements of land[^] cover or land[^] use. (ii) Vividness: the feature or landscape is visually striking, widely recognised within the local and wider community, and may be regarded as iconic. (iii) Naturalness: the feature or landscape appears largely unmodified by human activity and the patterns of landform and land[^] cover are an expression of natural processes and intact healthy ecosystems. (iv) Memorability: the natural feature or landscape makes such an impact on the senses that it becomes unforgettable.
(c) Expressiveness (legibility)	The feature or landscape clearly shows the formative natural processes or historic influences that led to its existing character.
(d) Transient values	The consistent and noticeable occurrence of transient natural events, such as daily or seasonal changes in weather, vegetation or wildlife movement, contributes to the character of the feature or landscape.
(e) Shared and recognised values	The feature or landscape is widely known and is highly valued for its contribution to local identity within its immediate and wider community.
(f) Cultural and spiritual values for tangata whenua [^]	Māori values inherent in the feature or landscape add to the feature or landscape being recognised as a special place.
(g) Historical associations	Knowledge of historic events that occurred in and around the feature or landscape is widely held and substantially influences and adds to the value the community attaches to the natural feature or landscape.

Outstanding Natural Landscapes and Features

AREA	NAME	TYPE
1	Rangitikei Highlands	Outstanding Natural Landscape
2	Ngamatea East Swamp	Outstanding Natural Landscape
3	Rangitikei Foredunes	Outstanding Natural Landscape
4	Reporoa Bog & Makirikiri Tarns	Outstanding Natural Landscape
5	Aorangi	Outstanding Natural Landscape and Feature
6	Lower Moawhango River	Outstanding Natural Feature
7	Rangitikei Narrows and Gorges	Outstanding Natural Feature
8	Raketapauma Wetland (Irirangi Swamp)	Outstanding Natural Feature

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 1		RANGITIKEI HIGHLANDS
Location:	NZ Topo 50 Map BJ36	
Description:	The northern and eastern parts of the Rangitikei District, the southeastern forested Kaimanawa Mountains and foothills, and the northwestern part of the Ruahine Ranges as far south as the Makirikiri Tarns.	
ONL/ONF/Amenity:	Outstanding Natural Landscape	
Natural Science	Geological/Geomorphological	Part of the sequence of axial ranges that are a significant geological feature of the North Island, running from Wellington to East Cape. Composed of uplifted greywacke, with infilled valleys consisting of ignimbrite and andestic layers from the Taupo volcanic eruption, as well as sedimentary marine deposits on lower slopes and plateaux. Oldest geological elements in the district, possibly in New Zealand. Some significant geological features such as 'The Hermitage' cuesta escarpment and open drainage channels of the upper Rangitikei River.
	Biological/Ecological	Significant stretches of indigenous flora and fauna habitats, including alpine, subalpine and tussock vegetation. Beech and podocarp forests cover much of the mountainland, and tussock grassland and subalpine vegetation dominate valleys and highlands.
	Hydrological	Important water catchment for major rivers, including the Rangitikei and Moawhango.
Perceptual	Memorability	Highly memorable landscape that forms a key part of the identity of the North Island of New Zealand. Kaimanawa Mountains important as backdrop to the World Heritage Area. Hermitage feature a distinct and recognisable escarpment landform.
	Legibility/Expressiveness	Very expressive of the tectonic uplift that has created the North Island, and of the erosion processes of river and drainage systems.
	Transient	Higher mountains often covered by snow in winter months. Ranges have a defining effect on the weather of the North Island.
	Aesthetic	High aesthetic value due to the complexity of landforms, geological patterns, indigenous vegetation cover and unmodified landscape.
	Naturalness	Significant tracts of unmodified natural vegetation cover, plus other areas of regenerating indigenous forest and tussock. Few building structures. Sense of wilderness and isolation.
Associational	Historical	Several historical sites and trading/walking routes throughout area. Pockets of early European migration and settlement throughout area. Traversed by William Colenso, and some flurry of activity when gold rumoured to be found in late 1860s.
	Tangata Whenua	Several significant archaeological sites of importance to local iwi. Mountain ranges and river headlands have high cultural significance as ancestral lands.
	Shared/Recognised	North Island's central axial ranges are recognised by many New Zealanders as a defining landform. Kaimanawa Mountains widely known as backdrop to Central Plateau and as an important recreational destination. Identified and protected in the RPS and Conservation Management Strategy.
	Recreational	Forest parks are used extensively by trampers, hunters and eco-tourists, and include a number of mapped trails and huts.
Summary of Key Values	Very high natural character due to the extensiveness of large scale natural landforms, covering of significant indigenous vegetation, feeling of isolation, wilderness, and lack of human occupation or modification. Important recreational area. Highly memorable for its naturalness, expressiveness and expansiveness. It contributes to the identity and sense of place of the District.	

RANGITIKEI HIGHLANDS

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 2		NGAMATEA EAST SWAMP
Location:	NZ Topo 50 Map BJ36	
Description:	Ngamatea East Swamp is an extensive unmodified swamp with strong north-south drainage patterns. The extensive indigenous vegetation assists with the area's function as a water catchment, feeding upper stream tributaries.	
ONL/ONF/Amenity:	Outstanding Natural Landscape	
Natural Science	Geological/Geomorphological	Extensive upland plateau which forms part of the oldest geological formations of the North Island.
	Biological/Ecological	Significant open country biodiversity of flora including several species recognised by DoC and unknown elsewhere in the North Island. Habitat for banded dotterel and fernbird species.
	Hydrological	Unmodified wetland area with natural drainage patterns and waterways.
Perceptual	Memorability	Highly memorable landscape due to simplicity, extensiveness (scale), naturalness and openness.
	Legibility/Expressiveness	An expressive landscape demonstrating its origin as an upland plateau water catchment, with drainage processes highly legible.
	Transient	Climatic values. Wind and snow in winter months.
	Aesthetic	Open vast wetland landscape with expansive sky, surrounded by majestic bold landforms of ranges and mountains.
	Naturalness	Largely unmodified natural wetland landscape resulting in high natural character.
Associational	Historical	Some historical activity in places, although largely unmodified landscape.
	Tangata Whenua	Highly valued by Māori for the cleansing provided by the water catchment, storage and drainage processes, and as a possible food source. Spiritual essence derived from being a headwater system to the Rangitikei River.
	Shared/Recognised	Natural character values recognised by Māori landowners and local iwi. DoC and RPS seek to protect clearance and promote eco-tourism.
	Recreational	Some hunting.
Summary of Key Values	Very high in natural character as a result of its significant ecological value, expansive open landscape, expressive wetland drainage and vegetation patterns. Highly valued by Māori.	

This topographic map depicts the Ngemena East Swamp area in Papua New Guinea. A red line delineates the 'Outstanding Natural Landscape' boundary. The map features contour lines indicating elevation, with labels such as 900, 950, 1000, and 1100. Key geographical features include the Ngemena East Swamp, the Omitoko area, and the Pukerua area. Rivers and streams are shown in blue, and roads are marked with dashed lines. A scale bar at the bottom left shows a distance of 0 to 5.000 kilometres. A north arrow is located in the top right corner.

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 3 RANGITIKEI FOREDUNES		
Location:	Whangaehu River and Rangitikei River	
Description:	Coastal foredunes	
ONL/ONF/Amenity:	Outstanding Natural Landscape	
Natural Science	Geological/Geomorphological	Active coastal dune system.
	Biological/Ecological	Modified vegetation, covering dunes between high water mark and pine plantations.
	Hydrological	Coastal lagoons, which contribute to function of the coastal processes where rivers meet the sea.
Perceptual	Memorability	Memorable for extensive unbuilt coastal foredune system.
	Legibility/Expressiveness	Clearly expressive of coastal dune processes.
	Transient	Climatic conditions of wind, coastal birds.
	Aesthetic	High aesthetic value due to linear extent of unbuilt coastal frontage.
	Naturalness	Generally high naturalness, but with some areas of modification due to tracks and non-native vegetation. Naturalness also influenced by proximity of settlements and pine plantations to the beach.
Associational	Historical	Unknown
	Tangata Whenua	Foredunes are part of the wider coastal dune system, which was highly significant to Māori. The foredunes themselves are of less direct value, but are essential in allowing the beach to breathe and the inland area to function as a healthy dune and wetland coastal system.
	Shared/Recognised	Dunes recognised for the importance they play in coastal processes.
	Recreational	Foredunes accessed from coastal settlements.
Summary of Key Values	Vital contribution to healthy functioning of coastal processes and erosion control. High aesthetic values of naturalness resulting from extensive unbuilt coastal strip. Cultural associational values of spiritual wellbeing and kaitiakitanga for Māori.	

RANGITIKEI FOREDUNES

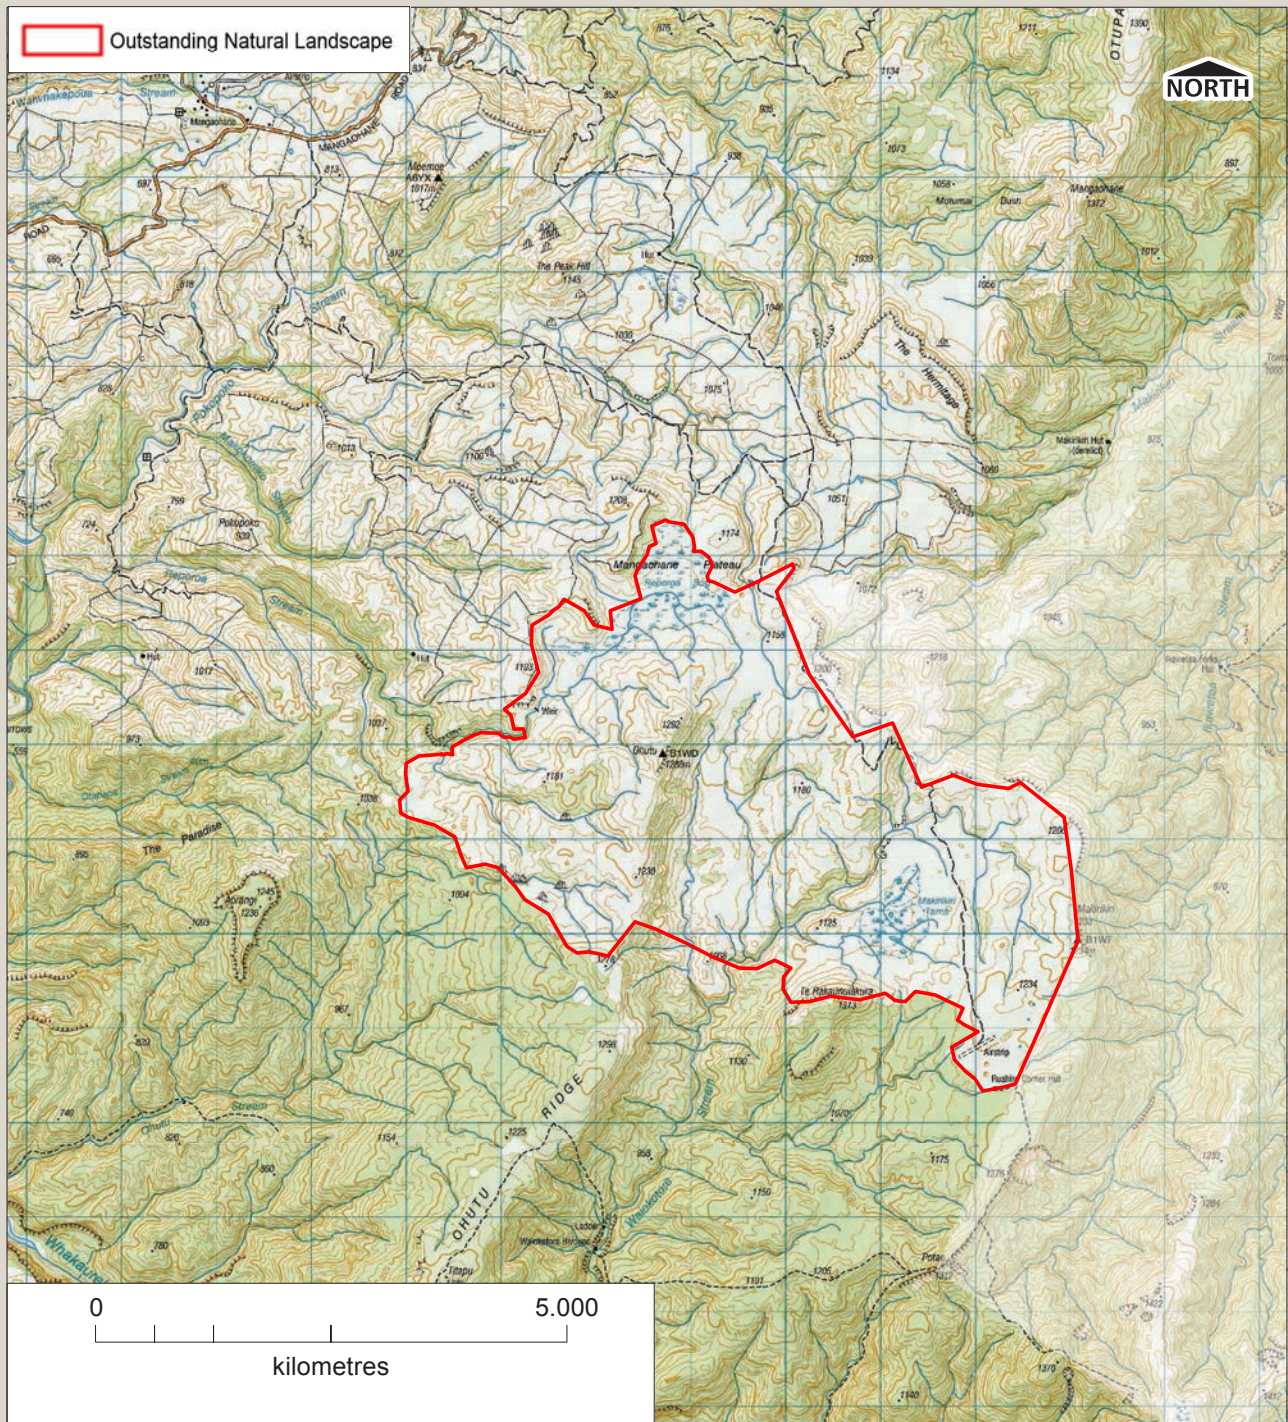

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 4		REPORO A BOG & MAKIRIKIRI TARN S
Location:	NZ Topo 50 Map BK36	
Description:	Upland wetland and tarn features which form the headwater catchment of the Reporoa and Pokopoko Streams (draining into the Rangitikei River).	
ONL/ONF/Amenity:	Outstanding Natural Landscape	
Natural Science	Geological/Geomorphological	Geological evidence of Taupo and Tongariro eruptions in the soil makeup. Part of the flatter upland plateaux systems.
	Biological/Ecological	Significant wetland and ephemeral wetlands containing rare indigenous flora and fauna species, with pockets of indigenous forest remnants. Includes some flora species that are found only in this site or region. Described by DoC as having extremely high botanical value.
	Hydrological	Important upland water catchment and wetland with an important role in maintaining/enhancing water quality. Has a complex network of drainage systems.
Perceptual	Memorability	Highly memorable landscape due to open and expansive flat topography and significant natural character.
	Legibility/Expressiveness	An expressive landscape demonstrating its origin as an upland plateau water catchment, with highly legible drainage processes.
	Transient	Climatic conditions. Snow in colder months.
	Aesthetic	Open expansive wetland landscape bounded by majestic bold landforms of ranges and mountains.
	Naturalness	Largely unmodified natural landscape with high degree of isolation and wilderness.
Associational	Historical	Unknown.
	Tangata Whenua	Unknown, although likely to be site of ancestral food source.
	Shared/Recognised	Mapped and described by DoC as an important upland wetland system with unique indigenous values.
	Recreational	Not readily accessible.
Summary of Key Values	Very high in natural character as a result of its significant ecological value, expansive open landscape, and expressive wetland drainage patterns.	

REPOROA BOG AND MAKIRIKIRI TARNS

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 5		AORANGI
Location:	NZ Topo 50 Map BK36	
Description:	A significant area of unmodified indigenous vegetation, enclosing the prominent peak of Aorangi and including part of the Ruahine Forest Park in the Ruahine Ranges.	
ONL/ONF/Amenity:	Outstanding Natural Landscape and Feature	
Natural Science	Geological/Geomorphological	Folded landscape with patchwork of deeply incised drainage catchments. Ruahine Ranges are part of the sequence of axial ranges that form a significant geological feature of the North Island, running from Wellington to East Cape. Oldest geological elements in the district. Aorangi is a visually prominent and uneroded 'tabletop' landform.
	Biological/Ecological	Significant stretches of indigenous flora and fauna habitat, including podocarp, alpine beech forest, and subalpine tussock. Important kiwi and titi habitat.
	Hydrological	Important catchment for the Rangitikei, Whakaurekou and Kawhatau Rivers. Indigenous forest cover helps to protect from flooding and protects water quality.
Perceptual	Memorability	Aorangi is a highly memorable landform feature due to its prominence, unusual 'tabletop' topography, and proximity to a large viewing catchment. Surrounding area also has high memorability as a large expanse of indigenous vegetation covering bold scale landforms leading to the high elevations of the Ruahine Ranges.
	Legibility/Expressiveness	Ranges very expressive of tectonic uplift. Includes a number of very expressive cuesta-type landform features such as Aorangi. Steep river and drainage valleys display natural erosion processes.
	Transient	Higher mountain ranges covered by snow in winter months. Ranges have a defining effect on the weather, which can change quickly. Some microclimatic effects caused by Aorangi and other foothills such as Mokai Patea and Hikurangi Ranges.
	Aesthetic	Aorangi has a unique and visually distinctive 'tabletop' shape with exposed rocky escarpments. Combined with subalpine vegetation this feature stands out as a dramatic contrast to the surrounding dark indigenous forest. Natural character of the whole landscape gives rise to significant aesthetic value.
	Naturalness	Extensively covered in unmodified indigenous vegetation with very high natural character, isolation and wilderness.
Associational	Historical	Several historic sites and trading/walking routes throughout, including many mapped out by early settlers and explorers (including William Colenso). Pockets of early European migration and settlement, although now largely devoid of human habitation.
	Tangata Whenua	Significant value to Tangata Whenua as ancestral land, with the feature of Aorangi itself (the place of the guardian, Pohokura, the sacred lizard) still in Māori ownership. Headwaters to rivers have significant ancestral value.
	Shared/Recognised	Identified and protected in the RPS and One Plan. The prominence and memorability of Aorangi causes this feature to form a key part of the identity of the district.
	Recreational	Tramping and eco-tourism provided by Māori land owners. Some rafting/canoeing in river headwaters.
Summary of Key Values	Very high natural character due to the extensiveness of large scale landforms, covering of significant indigenous vegetation, feeling of isolation, wilderness, and lack of human modification. Significant cultural and historical value. Important recreational area. Highly memorable landform features, such as Aorangi, contribute to the identity and sense of place of the District.	

AORANGI

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 6		LOWER MOAWHANGO RIVER
Location:	NZ Topo 50 Map BK35	
Description:	Moawhango River from downstream of Pungatawa to Rangitikei River. Deeply incised river valley that contrasts with the flatter surrounding topography. Exposed rock and limestone outcrops and some remnant indigenous riparian vegetation.	
ONL/ONF/Amenity:	Outstanding Natural Feature	
Natural Science	Geological/Geomorphologic	Deeply incised channel created by erosion processes – in some places deep narrow gorges and in others wider scallops.
	Biological/Ecological	Some remnant or regenerating indigenous riparian vegetation, although some evidence of grazing and presence of exotic flora species.
	Hydrological	Important tributary into the Rangitikei River with high water quality and quantity. Water flow significantly reduced since construction of the Tongariro hydro energy scheme.
Perceptual	Memorability	Highly memorable landscape feature due to the expressive incisions caused by the river. A distinctive feature that adds to the identity of the District.
	Legibility/Expressiveness	Highly expressive of the formative erosion processes cutting through the soft marine sedimentary deposits.
	Transient	Little transient value. Deep gorges likely to have some impact on microclimatic conditions, such as creation of mist on colder mornings.
	Aesthetic	High aesthetic value derived from the expressiveness and power of erosion. Visible rocky outcrops and bluffs add further interest.
	Naturalness	High natural character as a result of the geological process and extent of regenerating (if slightly degraded) vegetation cover. Contrasts with the more structured pastoral landscape the river also transverse.
Associational	Historical	Waters from Lake Moawhango used for hydro energy generation in the Tongariro power scheme, resulting in significantly lowered flow rates through this gorge.
	Tangata Whenua	The Moawhango River has significant cultural value to Māori for its life-giving properties and connection to ancestry. Important access route for early Māori.
	Shared/Recognised	Moawhango River is an important landmark for local people, providing identity and sense of place. Mentioned throughout District-wide marketing literature.
	Recreational	Fishing.
Summary of Key Values	High aesthetic value due to legibility of geological processes. Highly memorable due to scale of incision, integrity of valley sides, and their contrast with surrounding landscape. The difference between the Outstanding Landscape of the Lower Moawhango and the Amenity landscape of the Mid Moawhango is that the latter has shallower and less dramatic gorges and more exotic riparian vegetation.	

LOWER MOAWHANGO RIVER

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 7		RANGITIKEI NARROWS AND GORGES
Location:	NZ Topo 50 Map BK35, BK36	
Description:	Rangitikei River from The Narrows to downstream of Mangaweka. Very steeply sided, incised, meandering river valley and gorges with significant tracts of remnant indigenous riparian vegetation and exposed rocky outcrops.	
ONL/ONF/Amenity:	Outstanding Natural Feature	
Natural Science	Geological/Geomorphological	Deeply incised river valley with very steep-sided faces, sometimes with exposed rock outcrops or limestone bluffs. Demonstrative of river erosion processes through soft marine sedimentary layers.
	Biological/Ecological	Indigenous riparian vegetation enhances ecological value and river water quality.
	Hydrological	Water in the river and from stream tributaries has significant quality and quantity values, particularly on uses downstream. National water conservation order under current DP.
Perceptual	Memorability	Highly memorable feature due to dramatic scale and steepness of landform incision rising from the watercourse – more dramatic than surrounding folded landforms due to the presence of a significant waterway. Riparian flora adds to memorability as being an extension of the Aorangi ONL and a contrast to the modified pastoral landscape.
	Legibility/Expressiveness	Very expressive of erosion formation processes.
	Transient	Deep gorges likely to have some impact on microclimatic conditions, such as creation of mist on colder mornings.
	Aesthetic	Very high aesthetic values as a result of the scale and depth of incision, a dramatic and awe-inspiring landscape feature, with a meandering pattern of gullies that contrast with the pastoral landscape.
	Naturalness	Very high degree of natural character as a result of scale of geological processes and presence of indigenous riparian vegetation. Lack of building structures.
Associational	Historical	Unknown
	Tangata Whenua	The Rangitikei River has significant cultural value to Māori for its life-giving properties and connections to ancestry. Important access route for early Māori.
	Shared/Recognised	The gorge parts of the Rangitikei River are widely recognised by local people and form a key part of the identity of the central Rangitikei Region. Widely recognised for its white-water rafting opportunities. Many photographs available online.
	Recreational	Rafting, canoeing, bungy, gravity canyon. Trout fishing.
Summary of Key Values	Very high natural character values due to legibility of geological processes. Dramatic, awe-inspiring and highly memorable due to scale of incision, integrity of valley sides, and their contrast with surrounding landscape. Ecological and water quality values contributed to by existence of indigenous riparian vegetation.	

RANGITIKEI NARROWS AND GORGES

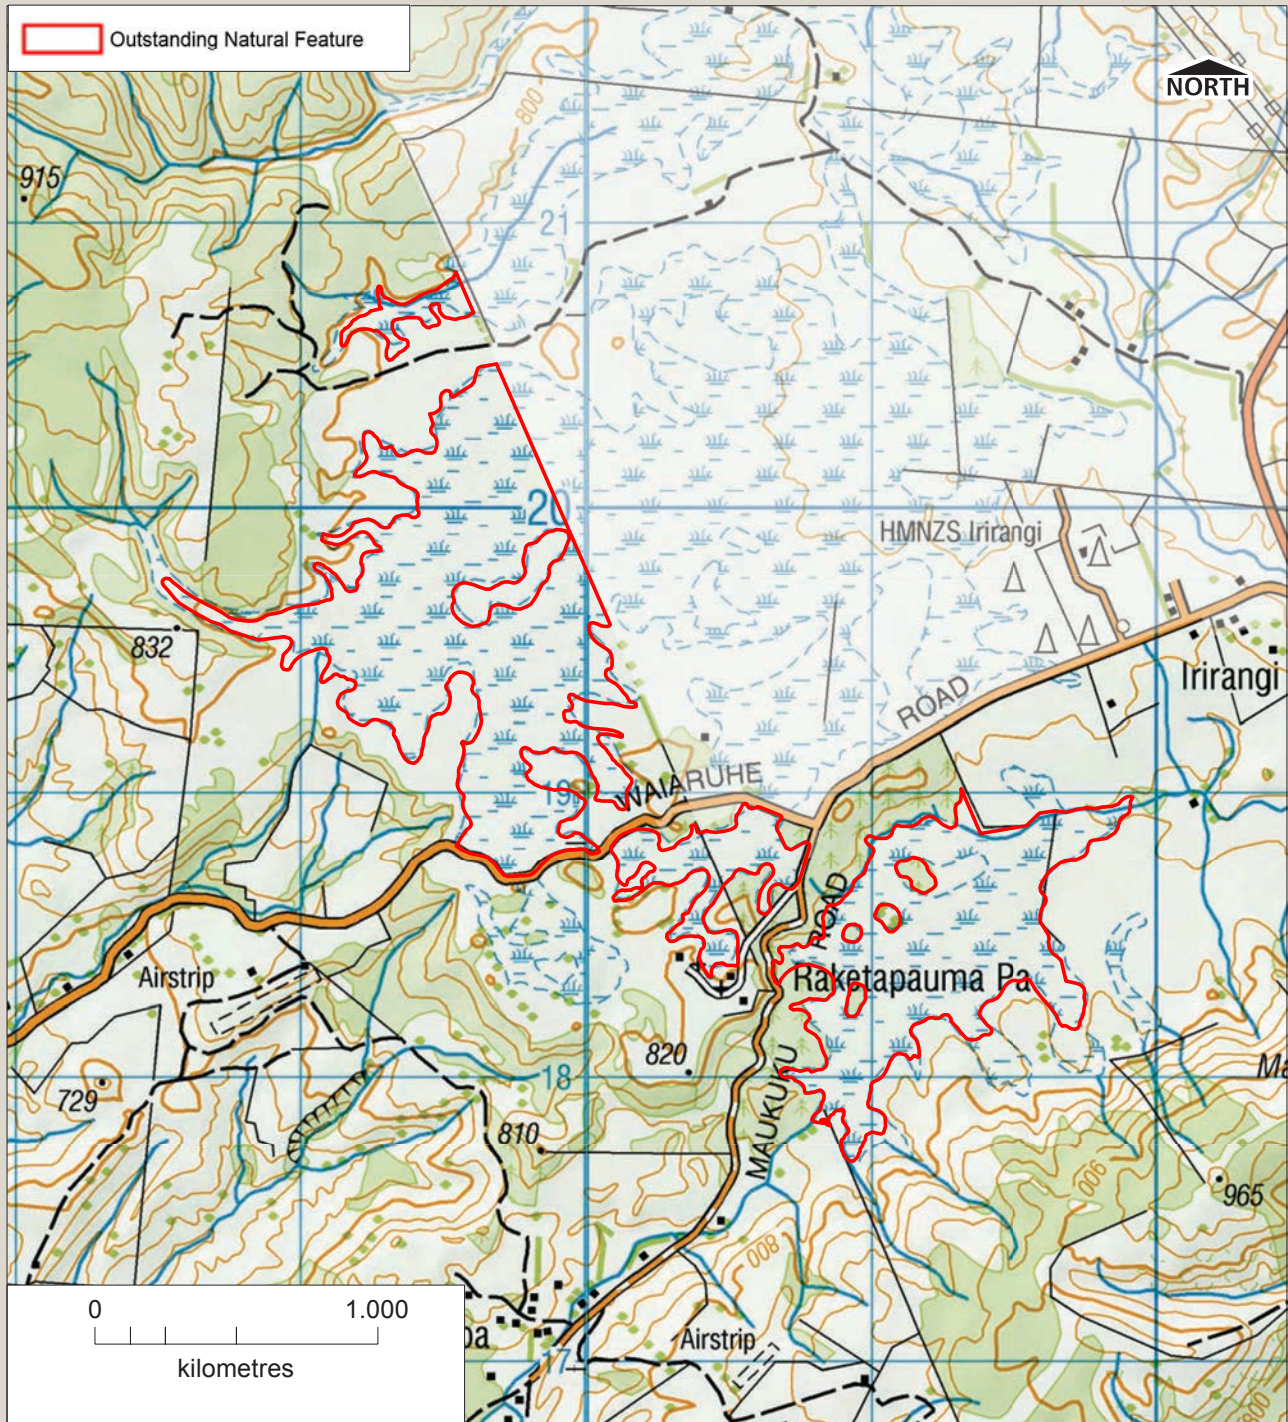

SCHEDULE C4 OUTSTANDING LANDSCAPES AND NATURAL FEATURES

continued

AREA 8		RAKETAPAUMA WETLAND (IRIRANGI SWAMP)
Location:	NZ Topo 50 Map BK35 & BK34	
Description:	The Raketapauma Wetland (Irirangi Swamp) is part of an extensive wetland system which is set partly in native tussockland against rolling hills of pasture and scattered pine plantations. The wetland is an example of a “drowned landscape” formed by the extensive peat bogs that have infilled and surrounded former hilltops.	
ONL/ONF	Outstanding Natural Feature	
Natural Science	Geological/Geomorphological	Volcanic debris followed by peat has infilled this area of hill country which has resulted in a flattened topography.
	Biological/Ecological	Regionally threatened flora (the swamp hood orchid, the unnamed <i>Prasophyllum</i> orchid also known as the scented orchid) and the regionally threatened North Island fernbird.
	Hydrological	Largely unmodified wetland area with natural drainage patterns and waterways.
Perceptual	Memorability	Highly memorable landscape due to simplicity, extensiveness (scale), naturalness and openness.
	Legibility/Expressiveness	An expressive landscape demonstrating its origin as an upland plateau water catchment with drainage processes highly legible.
	Transient	Climactic values. Wind and occasional snow in winter months.
	Aesthetic	Open wetland landscape with expansive low growing vegetation cover and simple form.
	Naturalness	Largely unmodified natural wetland landscape resulting in high natural character.
Associational	Historical	Some historical activity in adjacent settlement areas
	Tangata Whenua	Proximity to Raketapauma Pa. Highly valued by Māori as a food and material resource.
	Shared/Recognised	Natural character values recognised by DoC and preserved by land owners.
	Recreational	Unknown.
Summary of Key Values	High in natural character as a result of its significant ecological value, expansive open landscape, expressive wetland and vegetation patterns. Valued by Māori.

OHAKEA AERODROME HEIGHT THRESHOLDS

The height of every building, structure, mast, trees or similar object shall be so restricted that every point thereof shall not penetrate any of the climb, transitional or horizontal surfaces associated with Ohakea Airfield.

These surfaces are shown on this diagram as:

1. A wedge shape inclined plane rising at a gradient of 1 in 50 from their origin at the end of the airfield
2. A transitional surface on either side of the climb surface sloped at a gradient of 1 in 7.
3. A horizontal surface being the circular plan extending 4000 metres from the airfield at an altitude of 45 metres above (A.R.P.) (Alt 89.620 A.M.S.L.) and the circular plane extending out 6000 metres at an altitude of 115 metres above A.R.P. (Alt 159.620 A.M.S.L)

NOTE:

Aerodrome reference point (A.R.P.) level 44.620 A.M.S.L Coordinates 703731.1m, 291371.87m

SCHEDULE C5 DESIGNATIONS continued

Manawatu-Wanganui Regional Council (Horizons Regional Council) continued

Designation conditions:

Tutaenui Flood Control Scheme – Detention Dams E1, E2, E3, E4, E6, E7, E8, E9, E10, E11, W1, W2, W3, W4, W5, W6, W7, W8

The components of each dam site and the applicable restrictions are:

- Ponding area – no erection or placement of any structure other than fences.
- Earth embankment and spillway (either grass or concrete) – no erection or placement of any structure, no cultivation, excavation, drilling, tunnelling or other ground disturbance, no planting of trees.
- Inlet and outlet structures – no disturbance of, or interference with, the control pipes or debris screens or with the channel in the vicinity of the structure.

Porewa Flood Control Scheme – Detention Dams 29, 39, 42, 43, 44, 45, 46, 54, 62, 63, 64, 73, 75, 82, 83, 84, 85, 86, 92, 93, 94, 94A, 95, 96, 97, 98, 100

The components of each dam site and the applicable restrictions are:

- Ponding area – no erection or placement of any structure other than fences.
- Earth embankment and spillway (either grass or concrete) – no erection or placement of any structure, no cultivation, excavation, drilling, tunnelling or other ground disturbance, no planting of trees.
- Inlet and outlet structures – no disturbance of, or interference with, the control pipes or debris screens or with the channel in the vicinity of the structure.

Makirikiri Flood Control Scheme, Stopbank around Scotts Ferry, Walkers Stopbank, Kakariki Stopbank, Parewanui Stopbank (Scotts Ferry to Keas Property Stopbank)

None of the activities described in Rule 16-14 of the Horizons Regional Council One Plan are to be undertaken within the area of land between the bed of the river and a line 8 metres inland of the landward toe of the stopbank, without a resource consent.

Designation conditions:

Bulls Exchange

Height

- (a) That the height of any *mast** and associated antennas (excluding any lightning rod) shall not exceed 15 metres.
- (b) That antennas mounted on the roof of a building shall not extend more than 3 metres above the maximum height of the roof.
- (c) That the maximum height of any new buildings (excluding any *masts** and/or antennas) shall not exceed 10 metres.

Radio Frequency

- (d) That all equipment transmitting radio frequency energy shall comply with the limits for public exposure in New Zealand Standard NZS2772.1:1999 at any place where the public has reasonable access.

Outline Plans

- (e) That no outline plan shall be required for any internal building works that do not result in any increases in noise emissions, or for the replacement of any antennas with antennas of similar size provided there is no overall increase in the overall height of the facility.

Noise

- (f) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall not exceed the following *noise limits** at the site boundary 55dBA Leq at all times
- (g) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall cumulatively in combination with any other noise generating equipment on the site shall not result in any increase in existing noise levels received at any other property boundary where the levels in Condition (f) above are exceeded. A noise assessment shall be submitted as part of any outline plan to confirm the existing noise levels and predicted new noise levels to confirm compliance with this condition.
- (h) For any new electricity alternator required for emergency backup power generation and/or load shedding that exceeds the *noise limits** in Condition (f) above, that an outline plan shall be required that demonstrates how the equipment and any mitigation is the best practicable option (BPO) to ensure that noise levels do not exceed a reasonable level.

- (d) That all equipment transmitting radio frequency energy shall comply with the limits for public exposure in New Zealand Standard NZS2772.1:1999 at any place where the public has reasonable access.

Outline Plans

- (e) That no outline plan shall be required for any internal building works that do not result in any increases in noise emissions, or for the replacement of any antennas with antennas of similar size provided there is no overall increase in the overall height of the facility.

Noise

- (f) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall not exceed the following noise limits at the site boundary 55dBA Leq at all times
- (g) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall cumulatively in combination with any other noise generating equipment on the site shall not result in any increase in existing noise levels received at any other property boundary where the levels in Condition (f) above are exceeded. A noise assessment shall be submitted as part of any outline plan to confirm the existing noise levels and predicted new noise levels to confirm compliance with this condition.
- (h) For any new electricity alternator required for emergency backup power generation and/or load shedding that exceeds the noise limits in Condition (f) above, that an outline plan shall be required that demonstrates how the equipment and any mitigation is the best practicable option (BPO) to ensure that noise levels do not exceed a reasonable level.

Mt Ashcroft Radio Station

Height

- (a) That the height of any *mast*^{*} and associated antennas (excluding any lightning rod) shall not exceed the greater of the maximum height of the existing *mast*^{*} and attached antennas as at 30 April 2010, or 30 metres.
- (b) That antennas mounted on the roof of a building shall not extend more than 5 metres above the maximum height of the roof.
- (c) That the maximum height of any new buildings (excluding any *masts* and/or antennas) shall not exceed 10 metres.

SCHEDULE C5 DESIGNATIONS continued

Radio Frequency

- (d) That all equipment transmitting radio frequency energy shall comply with the limits for public exposure in New Zealand Standard NZS2772.1:1999 at any place where the public has reasonable access.

Outline Plans

- (e) That no outline plan shall be required for any internal building works that do not result in any increases in noise emissions, or for the replacement of any antennas with antennas of similar size provided there is no overall increase in the overall height of the facility.

Noise

- (f) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall not exceed the following noise limits at the site boundary: 7am – 10pm 50 dBA Leq; 10pm – 7am 40 dBA Leq
- (g) That any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation and/or load shedding) shall cumulatively in combination with any other noise generating equipment on the site shall not result in any increase in existing noise levels received at any other property boundary where the levels in Condition (f) above are exceeded. A noise assessment shall be submitted as part of any outline plan to confirm the existing noise levels and predicted new noise levels to confirm compliance with this condition.
- (h) For any new electricity alternator required for emergency backup power generation and/or load shedding that exceeds the noise limits in Condition (f) above, that an outline plan shall be required that demonstrates how the equipment and any mitigation is the best practicable option (BPO) to ensure that noise levels do not exceed a reasonable level.

DEFINITIONS

The following definitions apply wherever the following words and phrases are used in this Plan.

Terms that are defined in this section are marked with a ^{*} notation when used in the Plan. A term used in the Resource Management Act 1991 that is also used in this Plan has the same definition meaning as the Act. Terms defined by the Act are marked with a [^] notation when used in the Plan.

Accessory Building means any building which is accessory to the principal activity on the site; includes a garage housing vehicles used in association with a residential activity, a garden or implement shed, studio, or sleep-out.

Act means the Resource Management Act 1991 and all subsequent amendments of that Act.

Aerial or Antenna means the part of a radio communication facility or telecommunication facility used for transmission or reception, including mountings but not any supporting mast or similar structure. This definition excludes any antenna dish.

Agricultural research activities on Flock House farm means field based agricultural research and ancillary buildings and activities, including education facilities, laboratories, pilot plants for research purposes, staff offices and facilities and field days on the Flock House Agricultural Research Farm legally described as Lots 1-5 DP 424630, Lots 6-8 DP 407568, Lots 11-13 DP 407568 and Lots 15-17 DP 407568 (and any subsequent changes to legal descriptions), and as shown on Planning Maps 1 and 3. This is a 1030 hectare agricultural research farm located approximately 10km southwest of Bulls on Parewanui Road.

Allotment has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Alteration in relation to historic heritage means obscuring, defacing or damaging of, or change, removal or addition to, the heritage values, excluding the attaching, painting, alteration or removal of signs unless the sign is listed specifically in Schedule C3.

Amenity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Ancillary activity means an activity which is incidental to and associated with the primary activity which is undertaken on the site, and serves a supportive function to the primary activity.

Antenna dish means any flat, concave, circular, parabolic or similar-shaped radio communication or telecommunication apparatus used for transmission or reception, including the antenna dish mounting but not any supporting mast or similar structure. This definition includes any satellite dish.

Arterial Roads means roads serving an arterial function within or between regions or territorial authorities, having high safety standards and pavements in keeping with traffic use, with access controls where warranted.

Boundary means the legal boundary of any site, or in the case of more than one dwelling on a site, it is defined by the notional boundary of the complying net site area.

Building means any temporary or permanent or movable or immovable structure; and includes any structure intended for occupation by people or animals or machinery but does not include:

- any fence which has a height of 2 metres or less; or
- any structure which has a height of less than 1.2 metres above ground and a horizontal area of less than 5 square metres; or
- any vehicle, trailer, tent, caravan, or boat; or
- any swimming pool or tank, which has a height of less than 1 metre above ground; or
- any part of a deck, terrace, balcony, or patio, which has a height less than 1 metre above ground
- stockyards, loading races, and tanks.
- For the purpose of building setbacks – a building on production land that has a maximum floor area of 10m² and does not contain any sanitary fixtures (as defined in the Plumbers, Gasfitters, and Drainlayers Act 2006).

Building height means the vertical distance between the highest part of a building and the mean ground level immediately beneath that point of the building.

Building pre-inspection report means a report completed by a suitably qualified and experienced person (listed on the Rangitikei District Council register) that identifies all reinstatement works that are to be completed to the dwelling to be removed from an existing location and relocated onto a different site.

Coastal environment means the area within 500m of mean high water springs (MHWS) or the dominant ridge behind the coast, whichever is the lesser.

Collector Roads means roads serving a local function which are preferred routes for local traffic between or within areas of population or activities, complement arterial routes, and have pavements and

DEFINITIONS continued

road geometry in keeping with the operational safety standards required for the traffic volumes on each section of the route.

Commercial Activity means any activity or service offered or operated from any premises or land which involves the collection, repair, cleaning, hire or servicing of any household or domestic goods, equipment, clothing, footwear, gardening implements or machinery, bicycles, television or audio or radio equipment, or furniture, and includes offices and premises providing administrative, stationery, secretarial, or telecommunications services.

Commercial building means for the purpose of Rule B8.1-2 in Section B8 Natural Hazards, any building used for retail activities, commercial activities, offices, community facilities, educational activities, entertainment activities, manufacturing activities, fuel service facilities.

Community Activity means the use of any land or premises for any activity or service which has an individual or community health, welfare, care, safety, educational, recreational, cultural, ceremonial, spiritual, art, or craft purpose.

Community Facility means any land, building, or premises which provides any community activity, and includes any school, playcentre, hospital, medical or health centre or surgery, church, place of worship, hall, library, public art gallery, or community centre.

Comprehensive Development Area means the site located within the Commercial Zone in Bulls legally described as Lot 1 DP 303377, Lot 2 DP 303377, Lot 4 DP 12164, Lot 1 DP 306896, and Lot 7 DP 12164 contained in Certificates of Title 13562, 13563, 26913, WN487/87, WN728/36, located on Bridge Street, Bulls and identified on the Planning Maps.

Contaminant has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Contaminated land has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Controlled Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Council means the Rangitikei District Council or any Committee, Subcommittee, Commissioner or person to whom the Council's powers, duties and discretions under this District Plan have been lawfully delegated pursuant to the provisions of the Resource Management Act.

Coverage and **Building Coverage** mean the proportion of a site, when viewed in plan, which is covered by buildings, except that the following features or structures must not be included in the calculation of building coverage:

- roof overhangs or eaves having a width of 1 metre or less;
- any uncovered deck, terrace, patio, steps, balcony, or veranda;
- any pergola or similar structure of a substantially open nature;
- underground parking with landscaping above; and
- any swimming pool or tank which is not defined as a building.

Critical Infrastructure means infrastructure necessary to provide services which, if interrupted, would have a serious effect on the people within the District or a wider population, and which would require immediate reinstatement. Critical infrastructure includes infrastructure for:

- electricity substations;
- the treatment and storage of water for public supply (excluding the distribution network);
- the management of human sewage treatment (excluding the reticulation system);
- strategic road and rail networks (as mapped in the Regional Land Transport Strategy);
- health care institutions.

Daylight Setback means an area, measured as an envelope shape at each site boundary, which is imposed to control the distance of buildings from boundaries so as to maximise daylight to adjoining properties, except that the following building structures or features are permitted to encroach beyond the standard Daylight Setback for the site:

- eaves and spouting which project from the building at a horizontal distance of no greater than 700 millimetres;
- gable ends having dimensions no greater than 7.5 metres horizontally and 1 metre vertically;
- chimneys, ventilation shafts, water storage tanks, lift towers, machinery rooms;
- ornamental turrets, steeples, finials and other decorative features; and
- radio and television aerials and masts.

dB means the sound pressure level in decibels relative to a reference sound pressure of 20 micropascals. See NZS 6801:2008 clause 3 definitions of sound pressure, reference sound pressure, sound pressure level, decibel and sound level.

DEFINITIONS continued

Demolition in relation to historic heritage means defacing, destroying or dismantling of a heritage item or a component of an item or heritage area in whole or in part.

Designation has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Destination site means the site at which a relocated dwelling is to be moved to with the intention of the dwelling being reinstated as a dwelling, and connected to utilities and services.

Development means any work carried out on any land, including the construction, alteration, engineering, or demolition of any building, or any excavation of land (including mining), or any deposit of materials on land. This also includes redevelopment and the result of such work.

Discretionary Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

District means the area administered by the Rangitikei District Council.

District Plan means the Rangitikei District Plan.

Domestic scale renewable electricity generation means plant that is capable of generating electricity equal to or less than the peak energy demands of the lawfully established operation on the property including where a landowner supplies unutilised energy into the electricity grid.

Domestic scale wind turbines means turbines that are capable of generating electricity equal to or less than the energy demands of the lawfully established operation on the property including where a landowner supplies unutilised energy into the electricity grid.

Dwelling means a self-contained home or residence of a single household, whether or not joined to another dwelling.

Earthworks means any movement of earth, including the excavation or deposition of earth or cleanfill, that results in changes to the existing ground level. This includes, but is not limited to, earth movement associated with subdivision and site works as defined by the Building Act 2004.

Educational Activity means the use of any land or buildings for educational purposes, and includes any primary or secondary or tertiary school, kindergarten, or kohanga reo, and any hostel or accommodation ancillary to and incidental to the principal education purpose.

Effect has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Entertainment Activity means any land or buildings used for the purpose of entertainment, or social or cultural enjoyment, and includes any premises licensed for the sale of liquor, any cinema, theatre, electronic games facility, or recreational activity which is not otherwise a community activity.

Environment has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Erection means in relation to any building, including the re-erection or structural alteration of or the making of any addition to any building, or the placement of any building on a site, or the movement of any building from one position on a site to another position on the same site. "Erect" and "erected" have corresponding meanings.

Esplanade Reserve has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Essential Services means Council's reticulated sewage and water supply systems and stormwater systems.

Existing Primary Production within an Outstanding Natural Feature and/or Landscape means any existing primary production activity commenced before 31 October 2012.

Face Area (of a sign) means the total visible area of the face or faces of a sign, which are exposed or displayed for view.

Farm Track means a formed route for the movement of people, animals and vehicles and does not include a road.

Floor Level means the minimum floor level in a building.

Forestry – means the establishment, management and harvesting of an area of trees greater than 2 hectares for commercial wood production, and any associated activities.

Fuel Service Facility means any land or premises used principally for the retail sale of motor vehicle fuels and for the refuelling and servicing of vehicles, incorporating activities which are incidental to the principal refuelling activity including the retail sale of motor vehicle accessories, oils, spare parts, and convenience goods, and ancillary services including mechanical repairs, warrant of fitness testing, tyre

DEFINITIONS continued

servicing, and the hire of vehicles. This includes self-service refuelling facilities – being facilities that are automated and unmanned.

Grazing means the grazing of open paddocks or open space by domesticated livestock.

Greenfield subdivision means houses built on previously undeveloped land zoned for residential development.

Gross Floor Area means the area of a site or the combined area of all floors of a building, measured from the exterior faces of exterior walls or the centre line of walls separating two connected buildings, including any basement, and mezzanine area, but excluding any area of a site or building that is dedicated to vehicle access, stairwells, lift wells, loading and unloading bays, or toilet facilities. In relation to any *Comprehensive Development Area** this definition does not include the floor area of interior balconies and mezzanines not available to the public, and any carparking within the building.

Ground Level means the natural level of the ground, or the finished level of the ground when all engineering and development works that are required by the Council in the course of any subdivision or development have been completed.

Habitable Building means any building containing at least one habitable room.

Habitable Room means any living or sleeping area in a dwelling, visitor accommodation, or marae, any teaching area in an educational institution, and any recovery room in a hospital. Utility rooms such as kitchens and bathrooms are included except in relation to the separation distance rule for the Residential Zone.

Habitable space has the same meaning as in the Building Regulations 1992 and any subsequent amendments.

Hazardous Substance has the meaning set out in the Act, and includes any substance possessing one or more of the following intrinsic properties:

- an explosive nature
- flammability
- an oxidising nature
- corrosivity
- acute or immediate toxicity (including eco-toxicity)
- chronic or delayed toxicity
- radioactivity
- environmental persistence;

or:

- any substance emitting or breaking down to a substance with any of the above properties upon entering the environment;
- any substance which has any of these hazardous properties at any stage in its life cycle;
- any environmentally-damaging substance which, by effects other than toxicity, is able to damage an aquatic ecosystem (e.g. milk).

Note: For the purposes of the rules in this Plan, this does not include the incidental use and storage of hazardous substances and environmentally damaging substances in minimal, domestic-scale quantities, or any hazardous substances found in the trade waste sewer reticulation systems or gas pipelines included in the definition of network utilities, or fuel in motor vehicles, aircraft, boats, and small engines.

Height means the measure of the vertical distance between the highest part of the structure and the mean ground level immediately beneath that point of the structure, and building height has a corresponding meaning.

Heritage item means historic sites, places and areas listed within schedule C3, and in particular the qualities, character, structure or materials that give rise to the heritage values of the site, structure or building.

Historic Heritage has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Home Occupation means an occupation, business, trade, craft, or profession, the primary purpose of which is to derive income, and which:

- is ancillary to the residential use of the building;
- is undertaken or operated by a member of the household who resides on the property in which the home occupation occurs;
- involves no exterior storage, display, or other indication of the home occupation (other than an advertising sign permitted by this Plan) which would have the effect of altering the predominant character of the site or neighbourhood;
- involves no delivery or collection of goods, materials, or wastes, or visits by clients of the home occupation, outside the hours of 8.00 am to 8.00 pm;
- does not occupy an area larger than 60 square metres gross floor area;
- does not generate more than 24 vehicle movements per day.

DEFINITIONS continued

The following activities are specifically excluded from this definition:

- Retail activities, vehicle panelbeating, automotive wreckers and scrap yards, motor vehicle repairs, vehicle spray painting, sheet metalwork, and any other industrial process or trade which involves the continuous use of power tools or drilling or hammering machinery or activities.

Indigenous Vegetation means plant species that occur naturally in New Zealand or that arrived in New Zealand without human assistance.

Industrial Activity means the use of land or premises for the purpose of manufacturing, fabricating, processing, repair, packaging, storage, collection, or distribution of goods, and includes the wholesale or retail sale of goods manufactured on the site.

Infill subdivision means houses built on land subdivided in the existing residential zone.

Intensive farming means any farming which predominantly involves the housing or raising of livestock or poultry within buildings, and which depends on supplies of food rather than on grazing or crop production of the land on which the operation is located.

It includes:

- intensive pig farming undertaken wholly or principally in sheds or other shelters or buildings, where the number of breeding pigs exceeds 20;
- free range pig farming where the number of breeding pigs exceeds 20;
- poultry or game bird farming undertaken wholly or principally within sheds or other shelters or buildings, where the number of poultry or game birds exceeds 40;
- free range poultry or game bird farming where the number of poultry or game birds exceeds 40;
- mushroom farming;
- horse stables where the number of horses exceeds 20;
- boarding or breeding establishments for more than 10 dogs or 15 cats.

It excludes the following, provided the building is used for the purpose for which it was built:

- woolsheds;
- dairy sheds;
- calf pens or wintering accommodation for less than 30 stock (except where stock are being reared for the replacement of breeding stock to be used on the same property); and
- glasshouse production or nurseries.

Kaitiakitanga has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

LA_{eq} (15 min) means the A-frequency-weighted time-average sound level over 15 minutes in decibels (dB).

LAFmax means the maximum A-frequency-weighted fast-time-weighted sound level in decibels (dB) recorded in a given measuring period.

Lake has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Loading Bay means a space on a site available for a vehicle while being loaded or unloaded, including also the adjustment or covering of any load and the fuelling of the vehicle.

Major extension means for the purpose of Rule 8.1-1 in Section B8 Natural Hazards any addition to an existing dwelling, sleep-out, or the conversion of all or part of a non-habitable residential building (such as a garage) to include a habitable space.

Manufacturing Activity means any activity which involves the packaging, processing, assembly, storage, repair, or manufacture of goods or materials for sale or gain or service, but excluding any activity which involves the use of machinery or any process which gives rise to noxious or offensive smells or noise, or electrical interference which adversely affects adjoining activities, and including the wholesale and retail sale of goods manufactured on the site.

Marae means a site reserved under the Māori Affairs Act 1953 which is owned or administered by legally appointed trustees or a trust body for the common benefit of a defined group of Māori people, and includes marae based facilities and activities as follows:

- wharehui and halls, hui, meetings, and social gatherings;
- accommodation, kitchen, dining, and ablution facilities associated with any marae;
- churches and church activities;
- kaumatua flats or elderly persons' housing or kainga housing for people associated with the marae;
- education and training facilities and activities;
- childcare and kohanga reo facilities and activities;
- medical health services; and
- urupa and burial services and activities.

Mast means any mast, pole or similar structure designed to carry aerials or antenna dishes or to otherwise operate as an aerial or to facilitate radio communication or telecommunication.

DEFINITIONS continued

Minor Upgrading in relation to network utilities means to expand the capacity of an existing utility, where the effects of that utility remain the same or similar in character, scale and intensity as those that existed at 31 October 2012 or prior to the commencement of the minor upgrading for activities established after 31 October 2012. This includes an increase in the power-carrying capacity, efficiency or security of any line (such as adding additional circuits, reconductoring with higher capacity conductors, resagging of conductors, fitting longer or more efficient insulators, or the addition of earth wires which may contain telecommunication lines, earth peaks and lightning rods), utilising existing support structures or structures of a similar scale and character. A change in voltage will only be included when there is no physical change to the line, e.g. where a line has been constructed to operate at a certain voltage but has been operating at a lesser voltage. It also includes the installation of fibre-optic cables onto existing transmission lines.

National Grid means the assets owned or operated by Transpower New Zealand Limited.

Natural Hazard has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Natural Hazard Area 1 means an area that is at high risk from natural hazard events as follows:

- Land at risk of inundation from flood events with a 0.5% Annual Exceedence Probability (1 in 200 years) where flood waters will be deeper than 0.5m above ground level with a maximum water velocity of greater than 1.0m/s excluding freeboard.
- Makirikiri floodway as identified by Horizons Regional Council.
- Tsunami Hazard Area A.

Natural Hazard Area 2 means an area that is at significant risk from natural hazard events as follows:

- Land at risk of inundation from flood events with a 0.5% Annual Exceedence Probability (1 in 200 year) where flood waters will be no deeper than 0.5m above finished ground level with a maximum water velocity of 1.0m/s excluding freeboard.
- Tsunami Hazard Area B

Network Utility includes any facilities, structures and works necessary for, incidental to, and associated with:

- road or rail line;
- aerial, mast, antennae or dish antennae, including those used for amateur radio purposes;;
- wind monitoring mast;
- tower or pole;

- pole-mounted streetlight;
- line for telecommunication, transmission, sub-transmission, or any distribution line for conveying electricity – including associated pole- or ground-mounted switch gear;
- transformer, substation, compressor station, or pumping station;
- water supply or irrigation race, drain, or channel;
- pipeline for the distribution or transmission of natural or manufactured gas and any necessary incidental equipment, including compressor and gate stations;
- pipe, including any pipe for conveyance or drainage of water or sewage and other wastes or natural gas;
- navigational aid, lighthouse, or beacon;
- survey peg or survey monument;
- meteorological installation;
- telephone booth; and
- equipment incidental to the household or commercial or industrial connections to such utilities;

whether these are for private or public purposes; and including routine maintenance of these network utilities. Network utilities exclude wind turbines.

Network Utility Operator has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

New Primary Production Activity within an Outstanding Natural Feature and/or Landscape

means any new primary production activity (that would otherwise be a permitted activity within areas of the Rural Zone that are not within an ONFL) commenced on or after 31 October 2012 and/or that would result in a change to the balance of existing land use activities within an outstanding natural feature and/or landscape.

Note: In this definition, change to the balance of existing land use activities is an increase in the total area of land used for primary production or an increase in the intensity of land use at a landscape scale with regard to the values of the Outstanding Natural Features and/or Landscapes. The wholesale conversion of existing landscapes is to be avoided.

Noise limit means a LAeq(15 min) or LAFmax sound level in decibels (dB) that is not to be exceeded.

Non-Complying Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

DEFINITIONS continued

Notional Boundary means, in relation to noise measurement and assessment, a line 20 metres from any side of a dwelling, or the legal boundary where this is closer to the dwelling.

Objective sets out the direction the Council intends to take in relation to any issue, and what environmental outcomes it seeks to achieve.

Occupied space means for the purpose of Rule B8.1-2 Section B8 Natural Hazards a building or part of a building that people will occupy for at least six hours in any twelve hour period.

Offensive Activity means any activity which is predominantly concerned with any of the activities below, and which, by reason of the manufacturing method or the nature of materials used or produced, adversely affects the amenities of the surrounding environment. These activities are limited to:

- blood or offal treating;
- bone boiling or crushing;
- dag crushing;
- fellmongering;
- fish cleaning and curing;
- flax pulping;
- flock manufacturing or teasing of textile materials for any purpose;
- gut scraping and treating;
- refuse collection and disposal (excluding the day-to-day removal of refuse by Council or an authorised contracting agency);
- slaughtering of animals (excluding the on-farm slaughtering of animals for personal use, to feed the stock owner's animals and/or for animal welfare reasons);
- storage, drying or preserving of bones, hides, hoofs or skins;
- tallow melting;
- tanning;
- wood pulping;
- wool scouring;

Office means any commercial, professional, or administrative office, and includes any bank and premises offering financial services.

Official Sign means all regulation and traffic signs approved by a road-controlling authority or provided for under any legislation, such as health and safety signs, warning signs and identification signs.

Open Space means any public or private area of substantially unoccupied space or vacant land, and includes parks, reserves, landscaped areas,

and gardens, together with any ancillary seating and vehicle parking and pedestrian shelters and conveniences, but excludes any recreational facilities.

Outdoor Space means an area or outdoor space required by this District Plan to be provided for the exclusive use of each household unit to which the space is allocated.

Outline Plan means a Plan that shows works that are proposed to be undertaken on a designated parcel of land by a Requiring Authority.

Papakainga housing means the development of dwellings on ancestral land (whether held in Māori Multiply-Owned land ownership or not), and where the development provides for the reconnection and resettlement of Iwi and hapu to their acknowledged ancestral lands. This definition does not apply to single developments or multi-lot subdivisions that are not intended for resettlement purposes.

Papakainga land area overlay means the area set aside for the development of Papakainga Housing.

Parking Space means a space of useable shape and condition, and having an area not less than 15m² plus access and manoeuvring area. A garage or carport may count as one parking space for a household unit.

Permitted Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Primary produce sales means offering goods for sale (including fruit, vegetables, herbs, flowers, timber, nuts, eggs) on the site at which these goods were grown, and the goods have not been subject to further manufacturing or secondary processing. All goods must also be compliant with health and food legislative requirements and labelling.

Primary Production Activity means any agricultural, horticultural, floricultural, arboriculture activity, dairy or sheep or beef or other livestock farming, including cropping or fruit growing and forestry, woodlots, shelterbelts and the harvesting of crops. This includes activities ancillary to the above, including soil conservation, erosion control works, ecological restoration, and earthworks associated with the creation of dams, and the maintenance of tracks. It also includes temporary and permanent structures supporting these activities (e.g. stockyards, loading races, farm sheds and tanks). Primary production does not include intensive farming, quarrying, clearance or modification of indigenous vegetation or rural service activities.

DEFINITIONS continued

Production Land has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Prohibited Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Quarrying means the extraction and/or processing of minerals and other materials from the ground and any associated activities, where the minerals or material is on-sold and removed from the site. Quarrying does not include extraction from on-farm metal pits where the metal is extracted for the purposes of maintaining, repairing or forming new tracks on the same farm (whether or not this is held on the same title).

Radio Communication Facility means any mast, aerial, antenna, antenna dish, or other structure, facility or apparatus used or intended for the purpose of facilitating radio communication.

Recreation Facilities means any building or structure required to enable active recreation, including gymnasias, grandstands, stadia, clubrooms, viewing platforms, night lighting, and sealed courts.

Relocated Building and Relocated Dwelling mean any building or dwelling which is transported in whole or in parts and relocated from its original site to a new site, and which exceeds a gross floor area of 36 square metres, but excluding any prefabricated building which is delivered dismantled to a site for erection on that site.

Relocated building (heritage) means any building or dwelling listed in schedule C3, and any site listed in schedule C3A where a building or dwelling is relocated to or from.

Renewable Electricity means electricity produced from solar, wind, hydro, geothermal, biomass, tidal, wave, and ocean current sources.

Renewable Electricity Generation means generation of electricity from solar, wind, hydro-electricity, geothermal, biomass, tidal, wave, or ocean current energy sources.

Repair and Maintenance means, in relation to any historic heritage item listed in Schedule C3, work:

- that does not involve external additions, alterations, relocation, or partial or full demolition;
- confined to conservation, reassembly, reinstatement, repair or stabilisation of the original character, fabric or detailing of the premises;
- carried out using original or similar materials to those originally used and does not alter the form, character and appearance of the premises;

- that does not involve earthworks, beyond light cultivation (and not beyond the existing level disturbed) or the control of pest plant (noxious weed) species, where this is an existing use activity;
- in relation to fencing and roading, that does not extend beyond the current sites in use, and to a depth equal to the existing use; and
- that involves repainting of a building.

Reserve Area means land which is publicly owned and has reserve status under the Reserves Act 1977.

Residential Activity means the use, occupation, or habitation of any land or buildings by people for the purpose of residential accommodation, including domestic occupations and pastimes, and activities undertaken which are usually associated with residential accommodation, and also including any emergency housing facility or refuge.

Residential Dwelling Unit means the building or complex of buildings which accommodates one household unit.

Restricted Discretionary Activity has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Retail Activity means the use of land or premises for the retail sale or hire of goods to the public, including any cafe, restaurant, take-away food outlet, or other eating establishment.

Retail Shopping Core means the area of the commercial zone highlighted on the Planning Maps.

River means a continually or intermittently flowing body of fresh water, and includes a stream and modified water course, but does not include any artificial watercourse (including an irrigation canal, water supply race, canal for the supply of water for electricity power generation, or farm drainage canal).

Road has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Road-Side Sales means the use of land or premises for the retail sale of goods or foods produced and grown on the property from which they are offered for sale.

Residential Unit means the self-contained residence of a single household, including a dwelling house, flat, home unit, apartment, town house, and house.

RTS 6 means the Road and Traffic Standards 6: Guidelines for visibility at driveways, prepared by the New Zealand Transport Agency.

DEFINITIONS continued

Sensitive activity means the following activities where they occur within 12 metres of the outer edge of a National Grid support structure and 12 metres from the centreline of a National Grid transmission line: residential activity*, educational activity*, childcare facility, visitor accommodation*, and medical health services associated with marae* and community activity*.

Shelterbelt means the planting and maintenance of trees for shelter.

Sign means any device, apparatus, or structure for displaying or advertising to the public any information or illustration relating to any place, person, goods, services, land, premises, or other property, including any information or illustration that is painted, printed, written, carved, inscribed, endorsed, projected onto, or otherwise fixed to or upon any building, wall, fence, hoarding, rock, structure, or stationary vehicle of any kind (whether moveable or not), that is visible from any public place. Refer also to definitions for Temporary and Official Signs.

Site means an area of land comprised wholly of one certificate of title, or the area of land contained within an allotment on a plan of subdivision, or the area of land which is intended for exclusive occupation by one residential unit.

Soil Conservation and Erosion Works includes surface and subsurface drainage, earthwork, sills, debris dams, flumes and revegetation and tree planting.

Sports and recreation activities means any amateur sport, whether played with or without equipment installed on the sports ground; and any recreation activity that is engaged in without payment to a commercial operator or organiser.

Storage Area means an area above ground used to store materials (including refuse) associated with a residential, commercial or industrial activity.

Strategic Roads means roads which form part of a network of strategic national importance, having the highest standards with access control where necessary, and for which a high level of user service must be provided on a continuous basis.

Structure has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Subdivision has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Supermarket means a store within which retail sales are primarily of food and grocery.

Taihape West Slip Zone means the area identified on the planning maps.

Tangata Whenua has the same meaning as in the Resource Management Act 1991 and any subsequent amendments.

Temporary Activity means any activity undertaken for a short term duration not exceeding 3 days, either as an isolated event, or as a series of events, where the cumulative period of operation is generally less than one month, and which is limited to attendance or capacity of no more than 1000 persons where the activity is undertaken on a site, including any gala, sports event, festival, or other community activity.

Temporary Military Training means any activity undertaken for defence purposes. Defence purposes are those in accordance with the Defence Act 1990 and may include:

- tactical training exercises;
- fitness training;
- use of military equipment and arms; and
- use of military vehicles.

Temporary Sign means any sign advertising any forthcoming event, including any parliamentary or local authority election signs, construction or development works on any building or demolition site signs, or any exhibition or event signage, which is continuously displayed for no longer than 3 calendar months in any 1 year. It also includes signs advertising the sale or auction of land or premises, provided the sign is removed within one calendar month of settlement of the sale.

Upgrade means bringing a structure, system, facility or installation up to date or to improve its functional characteristics, provided the upgrading itself does not give rise to any significant effects, and the character, intensity and scale of any adverse effects of the upgraded structure, system, facility or installation remain the same or similar.

Urupa means cemetery or burial site.

Vehicle Access means the area of land within the site which provides safe vehicle access to and from the road to any parking area within the site, including the necessary manoeuvring area.

Visitor Accommodation means the use of land or premises for short-term living accommodation, which may include some ancillary services and facilities such as dining halls, restaurants, conference and meeting rooms, and recreational facilities for the use of guests and visitors.

DEFINITIONS continued

Wall Height means, in relation to a building, the vertical distance of an exterior wall of a building from the ground level to the roof, including any fascia, barge, spouting, or eave.

Warning Sign means any sign warning the public of any nearby natural hazard associated with any construction or demolition site or earthworks or other similar works.

Wetland has the same meaning as in the Resource Management Act 1991 and any subsequent amendments, and includes permanently or intermittently wet areas, shallow water and land/water margins that support a natural ecosystem of plants and animals that are adapted to wet conditions.

Wind Farm means the land (including one or more sites that may form a wind farm) activities and structures (including substations, lines and turbines), earthworks and access tracks associated with the generation of electricity from wind. It does not include domestic-scale turbines that are capable of generating up to 5kW of electricity and up to 20kW of total maximum output per site.

Wind Monitoring Mast means mast for the purpose of wind resource measurement. This includes guy wires, radio telemetry equipment (for transmitting meteorological data) and various meteorological instruments to be erected at varying heights, including: (a) anemometers to measure the average wind speed, wind gust speeds, turbulence intensity and wind shear; (b) wind vanes to measure wind direction; and (c) other meteorological instruments to measure temperature, air pressure, humidity and rainfall.
