Information Disclosure for Water Services – Minor Amendments

Kia Ora Suzanne

Thank you for the opportunity to provide feedback on the consultation on minor amendments to the February 2026 Information Disclosure for water services determination.

This submission is made on behalf of the Rangitīkei District Council. We consent to our submission being made public.

Rangitīkei District Council agrees with the proposed further exclusions to clause 2.4 of the Determination. However we have two questions:

- We note that clause 5.31 (Revenue and funding indicators – average total charge for household) and clause 5.33 (Revenue and funding indicators – revenue from charges and rates) are not included in the proposed amendment to clause 2.4. However, they imply an overall measure – indeed clause 5.33 uses the phrase *total* revenue. Is the intention of clause 5.31 and clause 5.33 to provide an average and clause 5.33 a total for *each* part of the service area, i.e. reflecting what has been disclosed under clause 4.9 for detailed information about charges for each part of the service area – or is it intended to be the overall average/total for the regulated supplier – or both?
- Given that clause 5.6 specifies information disclosure requirements for IFF levies, are they to be excluded from the disclosure required in clause 5.33?

The Council supports the other proposed amendments.

Ngā mihi

Carol Gordon
