RANGITĪKEI
DISTRICT COUNCIL

A message to all parents of students involved in Rangitikei Code Club:

Kia ora parents of our amazing coders!

Here's some fun work to boost your child's creative power. I promise it won't be so much of a homework to them but it can be to some of you parents and you totally got this!

Project Title: Imagine a World

Encourage your child to create a project on Scratch using their login details (hopefully they haven't forgotten it!) with a theme in mind where in a world anything and everything is possible. Get their little brains working by prompting them, "Imagine a world where..."

(Examples: Imagine a world with no gravity/ everyone can fly, imagine a world where no one goes hungry. Etc.,)

Spark their ideas with the "5 W and 1 H" questions,
WHAT does your ideal world look like?
WHAT could you do to help make our world a little better?
WHO inhabits your world?
HOW is your world so special?
