**Subject:** FW: LTDP 2024-2034

From: Keith McCallum < kwmccallum46@gmail.com>

Sent: Tuesday, March 19, 2024 6:13 PM

To: info < RDCInformation@rangitikei.govt.nz>

Subject: LTDP 2024-2034

Re Long Term District Plan Submission. Swimming Pool.

a.) I could see no allowance in the summary for revenue to be collected from the increased hours.

- b.) Have you explored the possible teaming with local schools and funding from the Ministry of Education to provide pool time for students to learn to swim and funding by the Ministry of Ed. for those schools that do not have their own swim pools. A strong case can be made that this approach will assist in helping to lower the poor record we have for drownings in NZ . A joint application between the schools and the RDC to the Lotteries Commission may also be worthwhile.
- c.)Town Centre upgrade and Marton awareness programme. I am concerned that the proposed upgrade lacks focus and a clear plan for a \$2.1m spend. Having been through a Town upgrade 20 years ago that went overtime, over budget, that ultimately cost a lot of businesses turnover and lower customer counts due to general disruption. Any upgrade must be well planned as I think all businesses will have had a tough time over the last five years.

# LTP 2024-2034 - Submission Form

Name/Ingoa: Fiona Moorhouse

## **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### **Comments about opening the Marton Pool:**

There are no indoor facilities open to the public anywhere in Marton and having the pool open all year round would mean that kids birthday parties and family gatherings could happen at the pool and families could spend more time together doing physical activity. Our population is growing and having this open all year round means rural people will have a reason to shop in Marton when they visit the pool, spend more time in town and spend more money while there. This is an investment in our community for the long term. Once the upgrade is done is does not need to be done again.

This means people can use the pool for fitness, physio and recovery all year and the staff are employed for more than a season.

We are surrounded by water and how do our young children keep up the momentum of lessons if they just start to get better then have to stop and start again 6 months later.

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

#### **Comments about Kerbside Collection:**

Provide basic rubbish collection for rural residents. We only live 5km from Marton but have to bring both rubbish and recycling to town yet it is apparently too hard for people already in town to drop off their own recycling.

If this is being done as a rural resident I do not want to have to pay for it as I still have to manage my own so there is no benefit to me.

### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Use the money to do the pool and then worry about the town centres.

#### Comments on upgrading Marton Main Street:

**Further comments:**

# LTP 2024-2034 - Submission Form

Name/Ingoa: Jane Abel

## **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### **Comments about opening the Marton Pool:**

Would be great to be able to have swimming lessons all year for kids so we dont have to travel out of town...and others from out of town will hopefully come to Marton. Just need to make sure that a decent swim coach is employed.

Could be marketed as an ideal pool for winter swim meets (and all year round) which would bring \$ into Marton/Rangitikei due to other spending

School holiday programmes would be great for the kids (and out of towners)

Good fitness option over the winter months - needs to be marketed effectively

Can lotteries grants help with updating the heating equipment etc?

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

#### **Comments about Kerbside Collection:**

Quite an increase in rates and debt so do staggered approach.

Compost own organic waste.

We don't live in town so have to take our recycling and rubbish to dump but will have to pay for this town service in our rate increase.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 1\* - Streetscape revitalisation for Marton

#### Comments on upgrading Marton Main Street:

But would want to keep it to tight budgets and nothing too flashy as adds to the debt and also rates

#### Further comments:

#### Attachments:

I would like to speak to my submission.

## Long term Plan 2024-2034 Written Submission

The Long-Term Plan 2024-2034 prepared by the Rangitīkei District Council appears to be well-suited for a small population based on its comprehensive and detailed approach to outlining infrastructure and financial strategies for the District over the next 10 years. The plan covers various critical aspects such as community outcomes, strategic priorities, asset management, resilience planning, and financial considerations, which are essential for the sustainable development and growth of a small population.

By focusing on community well-being, economic development, and infrastructure enhancement, the Long-Term Plan provides a strategic roadmap that ensures resources are allocated efficiently and effectively to meet the needs of the local residents proactively. Through initiatives such as road network maintenance, property management, water supply resilience, and community facility upgrades, the plan addresses key areas that contribute to the quality of life and overall well-being of the community in a small population setting.

The emphasis on improving asset data knowledge, managing critical assets, and strengthening infrastructure highlights the Council's commitment to enhancing the community's resilience and ensuring long-term sustainability. By proactively addressing challenges and prioritizing strategic actions, the Long-Term Plan sets a solid foundation for sustainable development and growth, catering to the specific needs and requirements of a small population like that of the Rangitīkei District.

In conclusion, the Long-Term Plan demonstrates a holistic and forward-thinking approach to addressing the needs of a small population, focusing on creating a vibrant and resilient community that can thrive over the next decade and beyond.

## Infrastructure Strategy

I have carefully reviewed the Infrastructure Strategy outlined in the document. The strategy appears to be a robust and comprehensive plan that addresses critical challenges facing Rangitīkei District's infrastructure. By focusing on key areas such as maintaining existing assets, improving resilience, managing critical assets, and enhancing asset data knowledge, the strategy demonstrates a proactive and forward-thinking approach to infrastructure management.

The strategy's emphasis on developing an optimized renewal program is crucial for ensuring that assets reach their maximum service life without compromising functionality. By actively monitoring asset conditions and planning renewals based on performance data, the strategy aims to sustain infrastructure quality and service levels over time. This proactive approach to asset management is essential for long-term infrastructure sustainability and effective service delivery to the community.

Furthermore, the strategy's focus on improving resilience across the infrastructure network is commendable. Considering the potential impact of climate change, natural hazard events, and aging infrastructure on service delivery, the strategy's initiatives to enhance infrastructure resilience and address critical risks demonstrate a proactive risk management strategy.

The strategy's commitment to enhancing asset data knowledge is also vital for informed decision-making and efficient asset management. By improving data collection, storage, and analysis processes, Council can make more informed decisions regarding asset maintenance, renewal, and performance optimization.

Overall, the Infrastructure Strategy outlined in the document appears well-designed and comprehensive. If effectively implemented, the planned initiatives are likely to work towards enhancing Rangitīkei District's infrastructure resilience, maintaining service levels, and ensuring the long-term sustainability of its assets.

## Financial Strategy

It is important to note that the effectiveness of any financial strategy, including the one outlined in the document, cannot be guaranteed even with extensive experience. While the financial strategy appears to be well-rounded and in line with standard practices for long-term planning, there are several factors that could impact its success over the next 10 years.

Economic conditions, market volatility, legislative changes, and unforeseen events can all influence the outcomes of a financial strategy. The ability of the Rangitīkei District Council to adapt to changing circumstances, implement the strategy effectively, and monitor its progress will be crucial in determining its success in the long run.

Given the complexity of financial management and the dynamic nature of the external environment, it is recommended that the Council continues to engage with financial experts, conduct regular reviews and assessments, and remain flexible in their approach to

ensure the strategy remains relevant and effective over time. By staying informed, proactive, and responsive to changing conditions, the Council can enhance the likelihood of the financial strategy achieving its intended goals over the next century.

#### Council Activities

Based on the information provided in the document, the Council Activities outlined in the Long-Term Plan 2024-2034 appear to cover a comprehensive range of areas including community leadership, roading, water supply, wastewater and sewage disposal, stormwater drainage, parks and reserves, community services, rubbish and recycling, regulatory services, and more. These activities reflect a strategic focus on infrastructure development, financial sustainability, and community well-being over the 10-year period.

The document highlights the Council's efforts to address key challenges such as maintaining and managing critical assets, improving infrastructure resilience, and enhancing asset data knowledge. By focusing on these aspects, the Council aims to ensure that essential services are delivered efficiently, and infrastructure systems are robust and sustainable for the long term.

To determine the sufficiency of these Council Activities for a 10-year period, it would be important for the Rangitīkei District Council to consider factors such as funding availability, community engagement, stakeholder collaboration, and potential changes in regulations and technology. Regular monitoring and evaluation of the progress of these activities will be crucial to adapt to evolving needs and priorities of the community.

In conclusion, while the Council Activities outlined in the document provide a solid foundation for the Council's endeavours over the next decade, ongoing assessment, feedback mechanisms, and flexibility will be key to ensuring that these activities remain effective and responsive to the dynamic environment in which the Council operates.

#### Policies and Financial Statements

As an accountant with extensive experience spanning 100 years, my approach to analysing the Policies and Financial Statements in this document would be rooted in the principles of prudent fiscal management. Here are some detailed considerations based on my expertise:

- 1. \*\*Comprehensive Analysis\*\*: I would conduct a comprehensive analysis of the financial policies and statements to gain a deep understanding of the organization's financial health. This involves scrutinizing income, expenses, assets, liabilities, and other financial metrics to assess the overall financial position.
- 2. \*\*Strategic Planning\*\*: I would review the organization's financial policies in alignment with its strategic goals and objectives. This includes ensuring that financial decisions support the organization's long-term sustainability and growth.

- 3. \*\*Risk Assessment\*\*: I would evaluate the financial risks faced by the organization and assess the adequacy of risk management strategies in place. This involves identifying potential financial vulnerabilities and recommending measures to mitigate risks.
- 4. \*\*Budget Management\*\*: I would review the budgeting process to ensure that financial resources are allocated efficiently and effectively. This includes analyzing variances, identifying cost-saving opportunities, and optimizing resource utilization.
- 5. \*\*Regulatory Compliance\*\*: I would verify that the financial policies and statements comply with all relevant laws, regulations, and accounting standards. Non-compliance can result in financial penalties and reputational damage, so adherence to regulatory requirements is crucial.
- 6. \*\*Performance Measurement\*\*: I would establish key performance indicators (KPIs) to measure the financial performance of the organization. This includes monitoring financial metrics, such as profitability, liquidity, and solvency, to track progress towards financial goals.
- 7. \*\*Audit and Assurance\*\*: I would recommend regular audits and financial reviews to validate the accuracy and reliability of the financial statements. This ensures that stakeholders can have confidence in the organization's financial reporting.
- 8. \*\*Transparency and Communication\*\*: I would emphasize the importance of transparency in financial reporting and effective communication of financial information to stakeholders. Clear and transparent financial statements build trust and credibility with investors, creditors, and other stakeholders.

By incorporating these considerations into the analysis of the financial policies and statements, the organization can strengthen its financial management practices and make informed decisions that contribute to long-term financial stability and success.

## Perpetual Debt Theory

Perpetual debt theory, which suggests that public entities like local councils can indefinitely sustain their debt by rolling it over, has gained some popularity as an unconventional approach to public finance. However, there are considerable risks and long-term

disadvantages associated with the application of perpetual debt by local councils, advocating for more conservative and sustainable financial practices.

Local councils have long been the fundamental units of local governance, bearing the responsibility of providing indispensable services and ensuring the maintenance and development of infrastructure at the community level. While fiscal policies have evolved over the years, the emergence of the perpetual debt theory represents a radical shift in thinking. This theory posits that local councils, backed by their authority to levy taxes and generate revenue, need not prioritize debt repayment but can instead perpetually refinance their obligations. Despite its theoretical appeal, this approach is fraught with practical dangers that can undermine the very fabric of local governance and fiscal sustainability.

#### 1. Intergenerational Equity and Ethical Considerations:

Perpetual debt theory eschews the principle of intergenerational equity by transferring today's fiscal responsibilities onto future residents. This is inherently unfair, as it presumes that upcoming generations will have the capacity or willingness to shoulder these financial burdens. Ethically, local councils have a responsibility to match the timing of their expenditures with revenues, ensuring that current taxpayers fund current services, rather than deferring costs to the future.

#### 2. Fiscal Discipline and Good Governance:

The requirement to repay debt within a finite period instills a natural constraint on borrowing, compelling councils to make judicious decisions about capital projects and long-term investments. The perpetual debt model weakens this discipline, potentially leading to a slippery slope of overleveraging and discretionary spending. Good governance calls for a balanced approach to financing, one that weighs the benefits of investment against the accountability to service debt.

#### 3. Interest Rate Risk and Market Volatility:

The assumption that a council can continuously refinance its debt neglects the volatility of financial markets and the dynamic nature of interest rates. A rising interest rate environment can turn manageable debt into a crippling fiscal burden, with higher service costs consuming a disproportionate share of the council's revenue, reducing its ability to provide essential services.

#### 4. Creditworthiness and Market Perception:

A council's credit rating reflects its financial health and a predictor of its ability to meet its obligations. A strategy predicated on perpetual debt could signal to credit rating agencies and investors a lack of commitment to fiscal prudence, potentially leading to downgrades.

Such outcomes not only raise the future cost of borrowing but also cast doubt on the council's overall financial management capabilities.

#### 5. Fiscal Flexibility and Budgetary Constraints:

Perpetual debt can create a scenario where debt servicing becomes a dominant expenditure within the council's budget, eroding fiscal flexibility. This inflexibility can be particularly deleterious in times of economic downturn or unexpected expenses, leaving councils vulnerable and unable to adapt to changing circumstances without severe budgetary cuts or tax increases.

#### 6. Public Trust, Transparency, and Accountability:

The implementation of perpetual debt strategies may undermine the public's confidence in their local council's financial management. The perception of kicking the can down the road without a clear repayment strategy can lead to scepticism and a demand for greater transparency and accountability. Public trust is a cornerstone of effective local governance, and any approach that potentially diminishes it must be approached with caution.

#### Conclusion:

The perpetual debt theory, while offering an enticing alternative to traditional debt management, introduces a myriad of risks that can destabilize the financial integrity of local councils. It contradicts the principles of intergenerational equity, fiscal discipline, prudent risk management, and the preservation of public trust. Local councils are urged to maintain a conservative and responsible approach to borrowing, one that balances immediate financial needs with the obligation to future taxpayers and the overall economic health of their communities. By focusing on sustainable financial practices, local councils will ensure they remain resilient, capable, and trustworthy stewards of public resources.

Key Choice 1 – Marton Pool Option 1.

Key Choice 2 – Kerbside Collection Option 1.

Key Choice 3 – Marton Main Street I Propose an alternative.

#### Key Choice 3 – Alternative Proposal

My suggested alternative which fits your stated goals more aptly is to create a comprehensive and sustainable economic growth plan. An outline of what I am thinking council can facilitate is below. I believe this achieves a much broader range of you intended goals than the original proposal.

#### \*\*Agricultural Innovation and Productivity\*\*:

- \*\*Specialized Research Grants\*\*: Encourage innovation by offering grants for research into crop and livestock improvements that are specifically tailored to the local ecology and climate.
- \*\*Agribusiness Incubators\*\*: Establish agribusiness incubators and accelerators to nurture startups that offer innovative products and services in the agricultural sector.
- \*\*Agricultural Co-op Support\*\*: Strengthen support for agricultural cooperatives that can leverage collective bargaining, shared resources, and marketing efforts.

#### \*\*Education and Workforce Development\*\*:

- \*\*Customized Training Programs\*\*: Develop training programs in collaboration with local industries to ensure that the skills taught are directly applicable to the needs of employers.
- \*\*Life-long Learning Initiatives\*\*: Promote life-long learning by providing community access to online learning platforms and establishing local learning hubs.
- \*\*Career Counseling Centers\*\*: Set up career counseling centers that provide guidance on local job opportunities, resume building, and interview preparation.

#### \*\*Economic Diversification\*\*:

- \*\*Local Investment Funds\*\*: Create local investment funds that focus on diversifying the economic base by supporting non-agricultural sectors such as technology, manufacturing, and services.
- \*\*Arts and Crafts Hubs\*\*: Support arts and crafts hubs that can turn local traditions into economic opportunities while preserving cultural heritage.
- \*\*Remote Work Infrastructure\*\*: Develop infrastructure that supports remote work, such as co-working spaces and reliable high-speed internet, to attract professionals who can contribute to the local economy remotely.

#### \*\*Infrastructure Improvement\*\*:

- \*\*Flood Defense and Irrigation\*\*: Invest in flood defense systems and sustainable irrigation to protect agricultural lands and ensure water availability.
- \*\*Transportation Network Enhancements\*\*: Enhance the transportation network with better roads, bridges, and public transit to facilitate the flow of goods and people.
- \*\*Digital Infrastructure Investment\*\*: Invest in the digital infrastructure necessary for modern businesses, such as data centers and enhanced cybersecurity measures.

#### \*\*Market Access and Trade\*\*:

- \*\*Bilateral Trade Agreements\*\*: Work with trade partners to establish bilateral agreements that can open new markets for local products.
- \*\*Farmers' Markets and Food Hubs\*\*: Establish farmers' markets and food hubs where local producers can sell directly to consumers, restaurants, and retailers.
- \*\*Export Processing Zones\*\*: Create export processing zones with favorable tax and regulatory conditions to encourage local production for export markets.

#### \*\*Fiscal and Financial Incentives\*\*:

- \*\*Deferred Tax Programs\*\*: Offer deferred tax programs for new businesses or expansions, providing relief during the critical early years of operation.
- \*\*Investment Risk Insurance\*\*: Provide investment risk insurance to mitigate the financial risks of new ventures and expansions.
- \*\*Competitive Advantage Studies\*\*: Fund studies to identify the competitive advantages of the local economy and target incentives that leverage these strengths.

#### \*\*Community Engagement and Collaboration\*\*:

- \*\*Local Leadership Development\*\*: Invest in leadership development programs that cultivate future community and business leaders.
- \*\*Community Vision Workshops\*\*: Organize workshops where residents can contribute to the vision and strategic planning of their community's future.
- \*\*Youth Councils\*\*: Establish youth councils to involve younger generations in the civic process and gather their unique perspectives on local development.

#### \*\*Sustainability and Environmental Stewardship\*\*:

- \*\*Green Business Certification\*\*: Develop a green business certification program that recognizes and promotes businesses adhering to sustainability practices.
- \*\*Carbon Footprint Reduction Initiatives\*\*: Implement initiatives aimed at reducing the carbon footprint of local businesses and the community at large.
- \*\*Biodiversity Projects\*\*: Partner with environmental organizations to launch projects that protect and enhance local biodiversity, such as reforestation and wildlife corridors.

<sup>\*\*</sup>Strategic Planning and Policy Alignment\*\*:

- \*\*Scenario Planning Exercises\*\*: Engage in scenario planning to prepare for different possible futures and ensure the community is resilient to economic shifts and environmental changes.
- \*\*Regulatory Sandbox\*\*: Create a regulatory sandbox environment where new businesses can test innovative products and business models without immediately incurring all the usual regulatory requirements.
- \*\*Economic Impact Analysis\*\*: Require economic impact analysis for all major projects to understand their potential effects on the local economy and mitigate any negative impacts.

#### \*\*Quality of Life Enhancements\*\*:

- \*\*Health and Wellness Programs\*\*: Implement health and wellness programs that promote a healthy workforce and reduce healthcare costs.
- \*\*Affordable Childcare Solutions\*\*: Invest in affordable childcare solutions to enable more parents to enter and remain in the workforce.
- \*\*Public Art and Green Spaces\*\*: Beautify the community with public art installations and well-maintained green spaces that enhance the appeal of the town for both residents and visitors.

## LTP 2024-2034 - Submission Form

Name/Ingoa: Kingsley Moorhouse

### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### Comments about opening the Marton Pool:

I want to be able to go to the pool all the time. I like to play there and it is nice and warm even in winter. I wish it was open all year so I could keep doing my swimming lessons even in winter so I could be a good swimmer. My school would also be able to come and use the pool when it is too cold to swim in the school one.

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

#### **Comments about Kerbside Collection:**

I want it to be easy for people to do their recycling

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

#### Comments on upgrading Marton Main Street:

Making the town more fun is better than making it pretty.

#### **Further comments:**

## LTP 2024-2034 - Submission Form

Name/Ingoa: Mel Pera

### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

#### Comments about opening the Marton Pool:

Until there is enough consistent numbers to warrant all year around maintenance and an investment from the community itself to support the pool being opened, the status quo is better than nothing at all.

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements?

#### **Comments about Kerbside Collection:**

I have no opinion, I live rurally so this does not affect me directly.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

#### **Comments on upgrading Marton Main Street:**

No

#### **Further comments:**

I would like to see the council support the Taihape Wellness Project, especially with regard to the upkeep and maintenance of the old Hospital grounds, which is where the Taihape Wellness Hub will be based.

In acknowledgement of the changes in the Government and the ever-increasing costs facing us all, it would be appreciated if the council were able to provide some financial assistance towards the project in supporting the purchase of the building from its current owners.

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

#### Comments about opening the Marton Pool:

Personally I don't use the pool. I've been to it once since moving here 2 years ago.

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

#### **Comments about Kerbside Collection:**

We pay for a small rubbish bin to be picked up each week and I take recycling in on a Sat morning which I'm happy to continue if it means no rate increase.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 1\* - Streetscape revitalisation for Marton

#### Comments on upgrading Marton Main Street:

Put coin BBQ and picnic tables at grass area by Mad Tom's. Also lease for car boot sales each week.

#### **Further comments:**

We moved to Marton 2 years ago from a big city and love the small town feel but there are limited shops and a lot of empty buildings which is a shame.

## LTP 2024-2034 - Submission Form

Name/Ingoa: Rachel Morrison

#### **Key Choice 1**

Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

**Comments about opening the Marton Pool:** 

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

Option 1\* - Streetscape revitalisation for Marton

Comments on upgrading Marton Main Street:

**Further comments:** 

## LTP 2024-2034 - Submission Form

Name/Ingoa: Randall Moorhouse

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### Comments about opening the Marton Pool:

There no where indoor in Marton to go during winter with a family and having the pool open all year round would mean that kids birthday parties and family gatherings could happen at the pool.

This is an investment in our community for the long term. Once the upgrade is done is does not need to be done again.

This will provide year round employment and our schools will use it all year round.

learning to swim means people need to keep going not stop and start again.

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

#### **Comments about Kerbside Collection:**

Don't make rural people pay for a service they don't get. Work on getting us a basic rubbish collection.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Spend the money on the pool and once that is done worry about making the town pretty.

#### Comments on upgrading Marton Main Street:

**Further comments:** 

## LTP 2024-2034 - Submission Form

Name/Ingoa: Rosie Gilbert

Organisation/Toputanga (if applicable):

#### Address/Käinga noho:

118 Jones Road Taihape

Email/Īmēra:

Phone/Waea:

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

#### **Comments about opening the Marton Pool:**

Too higher cost. There are other pools in Feilding

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Does not apply to me

Comments about Kerbside Collection:

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

#### **Comments on upgrading Marton Main Street:**

Not needed

#### **Further comments:**

- -More wasp control in Taihape parks. Nests need to be killed in Autumn for safety. Vespex alone is not cutting it.
- -Fast track the Taihape Playground. Council members need to be involved as this is too much work for just volunteers.
- -Toilets at the Rec need to be upgraded. The Nga Awa block is to far away.
- -I don't feel it's fair that rate payers are paying for public toilets, showers and caravan waste. We are supporting a huge amount of people passing through.

Be amazing to have this option in Rātana Pa

**Key Choice 3** 

Should we revitalise the Marton Town Centre?

**Comments on upgrading Marton Main Street:** 

**Further comments:** 

### LTP 2024-2034 - Submission Form

Name/Ingoa: Tania King

Organisation/Toputanga (if applicable):

Sport Whanganui

Address/Käinga noho:

226 London St

Email/Īmēra:

tania@sportwhanganui.co.nz

Phone/Waea:

06 349 2300

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### Comments about opening the Marton Pool:

Sport Whanganui supports the proposal that the Marton Pool remain open year-round. We acknowledge the cost to the ratepayer but hope this can be considered in context with the social value generated by extending the opening of the pool. Sport New Zealand research has found that for every dollar invested in increasing physical activity, \$2.12 worth of social benefit is generated. Similarly, a Royal Lifesaving Australia study found a social benefit of \$2.18 for every dollar spent operating aquatics facilities in regional Australia.

We know that many in the community would make use of the pool if it remained open throughout the year, with a meaningful impact on their physical, mental and social wellbeing. Sport Whanganui would welcome the opportunity to advise on activation opportunities that could support increased usage throughout the winter.

Long Term Plan 2024-34 Submission Form | Rangitīkei District Council

Subject: FW: My Say on Long Term Plan

From: Melanie Walshe < mwalshe@farmside.co.nz >

Sent: Thursday, April 4, 2024 9:46 AM

To: info < RDCInformation@rangitikei.govt.nz>

Subject: My Say on Long Term Plan

#### Hello

Firstly, Thank you for the informative document asking for feedback – it's the first time it has made me want to engage with the process!

#### 1. Marton Pool

If this is to remain open all year round, firstly there should be a concerted effort by the vocal minority wanting it open to attract multiple user groups from outside the district. As a large pool, it must be attractive for training. We have empty boarding houses during school holidays so why not encourage other users to get costs down? This should be a condition of opening it year-round. Personally, I think the money should be spent on improving the town centre, not on a pool used by few.

- 2. Kerbside collection option 2.
- 3. Revitalise town centre I'm in agreement with Option 1. Please remove the wooden lounging seat and the fairy mushrooms. Create a space for the barbeque that is often outside Countdown.

#### **Thanks**

Melanie Walshe
021 667 486
mwalshe@farmside.co.nz

Look to the future - Tirohanga Whakamua

Key Choice 1

I accept Marton probably doesn't have the population base to support the baths opening all year round.
But there are options:

1) With autumn seemingly stretching through to

June and beyond, consideration should be

given to extending the cennual closing time

(1) More advertising locally such as opening and

closing times: cost of endry; water temperature;

notification as special events such as

children's events. (blow up to play things)

(3) Individuation of compeditive events such

as water poto; net ball etc as the

Feelding baths support.

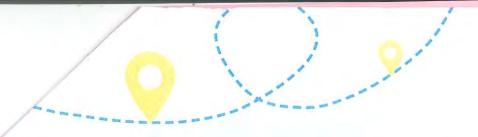

(4) Investigation into using existing venting

system to provide exita warnith.

Instroduction of bar heaters in changing rooms

I heard Strom an "expert" that the existing breeze block construction of the building is not conducive to a warm building. Yet the Wellington books on Oriental Bay has extensive glass on two sides whout any apparent extra heating except in the changing rooms.

Richard Cash. 4/4/24

Should we revitalise the Marton Town Centr	e? (see page 18)
l prefer	
Option 1*  Streetscape revitalisation for Marton.	Option 2 Status quo - Do not invest in streetscape revitalisation for Marton.

- Modify the varandas on the main street "Broadway" and install lighting to enhance the aesthetic appeal and functionality of the area.
- Replace the roundabouts in the town center with more modern and efficient structures to improve traffic flow and overall town aesthetics.
- Replace the Cooks and Village green wall at the main entrance of the town as it currently presents a negative image for the town center.
- These proposed changes aim to enhance the visual appeal, functionality, and overall attractiveness of the town center in the long-term town development plan.

Subject: Development Proposal for Marton Town Revitalization

I am writing to propose a comprehensive revitalization plan for Marton town, focusing on enhancing the streetscape and overall aesthetic appeal of the Main Street area. The following key recommendations are aimed at transforming Marton into a more vibrant and attractive town center:

### 1. \*\*Building Facade Renewal:\*\*

- It is recommended to paint all buildings along Main Street to give them a fresh and uniform appearance, thereby enhancing the overall visual appeal of the town center.

### 2. \*\*Roundabout Upgrades:\*\*

 The two roundabouts in Marton require upgrading to improve traffic flow and enhance the aesthetics of the town. Consideration should be given to implementing different styles of town planning to create a more cohesive and visually appealing environment.

### 3. \*\*Enhancement of Cooks Bar wall and Village Green Area:\*\*

- The wall next to Cooks Bar and Village Green presents an opportunity for creative community development. Suggestions include installing glass doors or windows to add a modern touch and improve the overall look of the town center.

## 4. \*\*Village Green Enhancement:\*\*

- The area in Village Green adjacent to Cooks Bar's wall is currently underutilized and unattractive. Proposals for this space include adding picnic tables to encourage community gatherings and enhance the overall appeal of the area.

# 5. \*\*Veranda Lighting Improvement:\*\*

 Enhancing the lighting on the verandas along Main Street can significantly improve the ambiance of the area. Consider adding new lights to create a welcoming and safe environment for pedestrians and visitors.

## 6. \*\*Collaboration with Business Rangitīkei:\*\*

- I propose that we collaborate with Business Rangitīkei on the town development project to leverage resources and expertise. Engaging a town developer to create a comprehensive development plan would be a crucial first step towards realizing our vision for Marton's revitalization.

I believe that implementing these recommendations will not only enhance the visual appeal of Marton but also contribute to creating a more vibrant and inviting town center for residents and visitors alike. I look forward to discussing this proposal further and working together to bring positive change to Marton.

Thank you for your consideration.

Jasleen Saluja Local business and building owner.

## LTP 2024-2034 - Submission Form

Name/Ingoa: H L Anderson

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

#### Comments about opening the Marton Pool:

Or - maybe perhaps do a Trial Run for an extended short period over winter to gauge what likely support there would be in relation to the extra cost involved?

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

#### **Comments about Kerbside Collection:**

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 1\* - Streetscape revitalisation for Marton

#### Comments on upgrading Marton Main Street:

Continue to keep Main Street Footpaths etc clean & tidy and maybe encourage owners of Empty Premises to keep Windows and Visible Spaces cleaner & tidy.

Some are shabbily spoiling it for the majority at the moment.

#### **Further comments:**

Keep up the good work, our Town and surrounds generally all look tidy and attractive.

Well done.

### LTP 2024-2034 - Submission Form

Name/Ingoa: Adejah Wharemate

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### **Comments about opening the Marton Pool:**

On behalf of the competitive swimming squad at Nga Tawa, I strongly advocate for keeping the Marton pool open year-round. The Olympic-sized pool greatly benefits our team, enabling us to maintain high fitness levels when the space is available. It also provides a training location for Nga Tawa triathletes and a welcoming environment for less confident students to learn swimming. Furthermore, the Marton pool serves as a valuable resource for boarders who can use the facility during weekends.

On a broader scale, I believe all tamariki in Marton should have year-round access to a facility that provides swimming lessons - inherently aiding in reducing the number of river and sea drownings nationally. An all-year open pool encourages regular physical activity and contributes to the overall well-being of its users, providing undeniable benefits to all who should make use of it. For these reasons and many more, I believe it is in the best interests of the council to open the pool all year.

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

## LTP 2024-2034 - Submission Form

Name/Ingoa: Amanda Jane Emery

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

#### **Comments about opening the Marton Pool:**

We worry the pool is not used enough to have it open all year. A number of schools have pools etc.

The paint job inside is awesome.

It is great they are adding some fun events for kids and the youth Eg.Music blow ups etc Back to school events etc.

It always seems quiet there??

We know older people were keen for aerobics again and that didn't happen.

Would other towns use it as of the size ?

We take groups of children there and it's not a friendly place .This seems a shame .

When we take these same children out of town to pools there is a better atmospheres .

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 1\* - We roll out three bin kerbside collection services in one go starting January 2027.

#### **Comments about Kerbside Collection:**

2027 is along way off!

Do you have to wait that long?

It would be great if you improved things now.Eg.Longer hours at the recycling centre Why aren't the hours or part ot it 24 /7 to encourage people to participate .?

We miss the recycling Pick up service that Jake provided .

When you bring in your new changes we hope your respect and honour the local services we pay for now Eg.Rangitikei wheelie bins.

It would if your communication improved about your services .

There was nothing on your website about the new changes on recycling .signage is useless at the centre .

Every time it's a holiday etc everyone asks the hours on Facebook local pages etc! We suggested you communications person Ben put up communication about the new changes that were

clear .This has not happened

There fore due to your communication we thing you need to do everything at once as from past experience it would be confusing for the public to be phased in.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

#### **Comments on upgrading Marton Main Street:**

We saw what happened when you got the consultant from Australia!!

We respect the service groups innMarton who do great things for the town that are long term and valued . Also the Marton Development Group.

Please do sort out the corner building .

It seems such a shame not to use the site with its location. We don't know why you brought it if you aren't going to use it??

We understand it's messy with earthquakes and historical people but it was like that when you brought it?? It seems logical to use it as it's in town and you have green space stage etc!!

Which has no public toilets near

We think you Should build on this site seen you are building a way!!

It all seems rather crazy ,!!

We were a a public meeting where Cr.Carter from Bulls was incredibly rude to a member of the public about the safety of this building when they described what it was like walking there!

Now you are are painting poles?

Surely you can explain this to the mp govt etc and use this site

#### **Further comments:**

We are sending the piece above that your computer survey said was over the limit . We will have to send on an email as it's 4 43 pm on a Sunday .

#### **Comments on upgrading Marton Main Street:**

#### **Further comments:**

I would like the council to support the Taihape Wellness Project by providing ongoing maintenance of the grounds and caretaking at the future site. If there is any additional financial support available for the Taihape Wellness Project, this would be appreciated greatly by the Taihape community.

# LTP 2024-2034 - Submission Form

Name/Ingoa: Andrew Haworth

#### **Key Choice 1**

Should we open the Marton pool all year round?

Option 1\* - The Marton pool would remain only open on a seasonal basis.

**Comments about opening the Marton Pool:** 

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

**Comments about Kerbside Collection:** 

#### **Key Choice 3**

Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

Comments on upgrading Marton Main Street:

**Further comments:** 

# LTP 2024-2034 - Submission Form

Name/Ingoa: ANGELA MCINTYRE

#### **Key Choice 1**

Should we open the Marton pool all year round?

#### **Comments about opening the Marton Pool:**

Infrastructure of the roading takes priority.

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements? no change

#### **Comments about Kerbside Collection:**

Infrastructure remains the priority for our region.

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

other projects such as good infrastructure is key to regions viability

#### Comments on upgrading Marton Main Street:

People move to regions for its locations and good services that it provides so infrastructure needs to be the priority.

#### **Further comments:**

please see attachment for my comments and opposition of what is being proposed

#### **Attachments:**

RANGITIKEI DISTRICT COUNCIL LONG TERM PLAN.docx, 0.03MB

#### Speak to submission:

I would like to speak to my submission.

#### RANGITIKEI DISTRICT COUNCIL LONG TERM PLAN:

#### 1. JUNCTION OF OTARA ROAD & STATE HIGHWAY ONE TURNING BAY:

- Otara and State Highway 1 junction North of Ohingaiti is dangerous to all road users especially those who are turning right onto Otara Road, heading north.
- Police/speed camera have a designated sight to park but this needs to be removed due to safety concerns. There is a high potential for an accident due to many factors, but a turning bay will solve this issue.

#### SHORT TERM SOLUTION - UNTIL THE TURNING BAY IS IN PLACE

A simple inexpensive immediate fix would be for the District Council to ensure a
double yellow no passing line is at this location to prevent overtaking around the
intersection until the turning bay is in place.

#### 2. OTARA BRIDGE ANCHORED ON ONE SIDE

- Swing bridges are designed to move.
- Speed bumps and blocks that are in place are hazardous and inhibit long/wide horse floats, caravan, tractors and implements from using the bridge that are under the designated weight restriction.
- Speed bumps are sharp, and vehicles are damaging undercarriages of lower cars, dangerous for push bikes, etc.

#### SOLUTION

 Obtain a second opinion on the long-term viability of the bridge with one end being anchored.

#### 3. GRASS CLIPPINGS DUMPED ON MCINTYRE RESERVE

 Grass clippings are being dumped on side of the road by Council near the fence in McIntyre Reserve. This encourages the public to dump green waste and rubbish on the berm, increasing hazards (e.g. fires) and is unsightly to visitors and the community.

#### 4. UNSIGHTLY RUBBISH ALONG AND ON ROADSIDE IN OHINGAITI

Please see this is removed along old main road, etc.

#### 5. MOAWHAONGO DAM RELEASE

- Moawhaongo dam release causes both short- and long-term damage to aquatic life.
- A thick layer of sludge/sediment is released during low flows and smothers the riverbed until the next flood.
- Releasing the dam during the summer months inhibits recreational users of the Rangitikei River.
- Council assets are at risk of damage due to debris build up.
- There is an increase in cost to Council having to monitor Council assets.

 The local community, visitors and iwi groups cultural and leisure activities are impacted by the dam release.

#### SOLUTION

- Releases during January March must be banned.
- The District Council must advocate for change including via submissions to the Regional Council.
- The District Council must ensure feedback is given to compliance and regulatory teams at Council on consent conditions appropriateness.
- Conditions must be reviewed, input from the community adopted and complied with.
- The contract with Genesis Energy is renewed in 2030? And the public need to be involved and to be educated on the consequences of the releases.
- The releasing of the dam reverses Horizons, intensive winter grazing laws where farmers are required to limit sediment in the rivers and waterways. This makes a mockery of the prior winter management practises that farmers are required to comply with.
- Farmers wear the blame for sediment in the river whist the impacts caused by Genesis Energy get ignored.
- Council plays a part in providing education to the public on other causes of poor water quality such as gravel roads, Rangitikei River cliff erosion (which is natural), Natural bush erosion, under-sink waste disposal units.

#### 6. SEDIMENT AND NUTRIENTS IN WATERWAYS

- Addressing the sediment going into the waterways has been addressed by altering
  farming practises. I would like to address one factor that the urban community can
  do to limit their activities such as Undersink waste disposals. These have a huge
  impact on wastewater quality as they create sediment from food and other products
  that are placed in such down the sink. Out of mind out of sight this practice has no
  consideration to the environment.
- Gravel roads also contribute to sediment in the waterway. Running along the road in water tables, under the roads via culverts, along farmland then into the waterways. What analysis has been done on their contribution to sediment in the waterways looking at the complete picture of sediment contributions. In dry times it is also airborne from wind road users and the like.

#### SOLUTIONS

- Banning under sink waste disposals will immediately decrease contaminants.
   Septic tank users do not have such items as we are aware of the consequences of such practices.
- Educate the region on the consequences of poor practices so that the urban community can lower their footprint.
- Analyse the sediment runoff from gravel roads and adjust the blame and re-educate accordingly. This is a nationwide issue so there should be research and science on this issue so little funding is needed from ratepayers.

#### 7. WEATHER MODIFICATION

- The core issue of 'climate change' is weather modification programs. This creates the extreme weather we are seeing today.
- I do not consent, and I am opposing all weather modification programs including, solar radiation management (SRM) using stratospheric aerosol injection (SAI) that is being implemented across the region and across New Zealand.
- 52 countries have active weather modification. Our connection to the Paris
  agreement means we are participating by default without individuals' consent. This
  document outlines what is being proposed the consequences of doing these
  experiments. The Paris Agreement And Climate Geoengineering Governance, The
  Need For A Human Rights-Based Component, CIGI PAPERS No. 111- October
  2016.<sup>[1]</sup>
- The Council needs to investigate what is happening in the atmosphere above the Rangitikei and understand the full implications of the consequences is urgently needs addressing needed as the results can be irreversible to the environment.
- Both rural and urban communities will be affected by such programmes. More extreme weather events will occur and have a high economic impact to our region.
- Weather modification has a direct impact on the safety of our water supply, to soil
  viability and crop production as it inhibits the full potential of photosynthesis which
  is the essential in the carbon cycle. By reducing CO2 and photosynthesis the
  counter effect is lowering the availability of oxygen.
- Testing of contaminants in the water (including all metals), air quality, land and sea must be addressed to establish the full impacts to human life, animals, livestock and to the biodiversity to plant life.
- SAI/SRM leads to extremes in weather and causes flooding and droughts... extremes in weather what is recognised and called 'Climate Change'.
- One consequence of geoengineering is the decrease in food production as seen in cyclone Gabrielle and the decimation of the Hawkes Bay, the fruit bowl of New Zealand. SAI/SRM inhibits the planet's life support function, consequently it diminishes the ability to feed the world.
- Agriculture is important to Rangitikei's economy; therefore, the council has an
  obligation to ensure the damaging impact of geoengineering practises does not
  negatively impact economically on the region and businesses.
- Agriculture in New Zealand is wearing the blame of weather modification programmes. The District Council has an obligation to ensure the public is well educated on the cause of climate change at a local level therefore investigate into this issue is vital. Solutions can be found in references below.
- Global Dimming projects [1][2] need to be banned immediately to inhibit further damage. These programmes have impacted negatively on the health of our land, and sea; all life as we know it. This alone will immediately reduce the effects of manipulated 'climate change' and High-frequency Active Auroral Research Program [H.A.A.R.P] programmes must be stopped.
- The spraying of components such as sulphur dioxide is identified as causing acid rain known to be detrimental to the health of humans. This causes diseases such as asthma and lung disease as well as acidifying the water supply and soil. Altering new zealand landscape through carbon schemes by planting trees (increasing pine tree numbers) decreasing farmland for livestock, increases the phenomena called thunderstorm asthma. [15][16][17]

- Carbon Dioxide [CO<sub>2</sub>] IS NOT POLLUTION it is essential to all life. Ecosystems are
  fragile; weather modification in the name of reducing 'climate change' is decreasing
  planet biodiversity and needs to stop.
- Marine Cloud Brighten [MCB] research recognises that ozone is being depleted during this process. New Zealand scientists are involved in this experimental research. This practice increases the penetration of Ultraviolet light into the ocean. UV light [measured UVR light] has decreased the numbers of plankton, krill and the like, it is even recorded that some fish now have skin cancer. [14] The main source of oxygen mostly comes from plankton. The carbon cycle has supported the planet for millions of years, photosynthesis is essential for all live and carbon dioxide is critical for the cycle to function properly.

#### SOLUTIONS

- Testing water supplies, soils, and the like need to be completed to establish base lines – please consider that these have already been contaminated nevertheless they are a starting point. Ongoing regular thorough testing needs to be done as shown in the references.
- Public education is needed for all citizens amongst the community. Surveying of citizens, gaining permission is vital.
- Immediate banning this experimental weather modification is essential to minimise the short and long-term damage.
- Finding solutions with a direct focus on human rights to information is vital.
- District Plan rules must prevent any discharge of contaminants from air without resource consents.
- Resource consents (both regional and district) must be easily accessible to the public via public GIS mapping.
- Public complaints and concerns must be recorded and available to the public on request. Councils systems must be robust to ensure this information is readily available.

#### **Key Choice 1**

Should we open the Marton pool all year round?

**Comments about opening the Marton Pool:** 

#### **Key Choice 2**

How do you want to roll out the kerbside collection requirements?

**Comments about Kerbside Collection:** 

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 1\* - Streetscape revitalisation for Marton

#### Comments on upgrading Marton Main Street:

I believe that the MartonCBD is in need of a refresh and that if this was to be done it could help attract people to the town.

Whilst I don't live in Marton, it's somewhere that I've become fond of, and it saddens me that the CBD has in some ways been allowed to deteriorate.

It would be good for council to spend money on a revitalisation of Marton as I think it will show that we take a greater pride in the town.

#### **Further comments:**

## LTP 2024-2034 - Submission Form

Name/Ingoa: Bethany Erin Sellwood

Organisation/Toputanga (if applicable):

#### Address/Käinga noho:

9 Anzio Place, Awapuni, Palmerston North

#### Email/Īmēra:

bmambo77@gmail.com

#### Phone/Waea:

+64211162123

#### **Key Choice 1**

#### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

#### Comments about opening the Marton Pool:

Having the Marton pool open all year around would give competitive swimmers the opportunity to train all year round and the chance to focus on their skills in the off-season. New Zealand has one of the highest drowning rates (1.80 per 100,000), and I believe it is important to keep the pool open to give inexperienced or beginner swimmers the best possible chance to improve their abilities to avoid any future tragedies.

#### **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

#### Comments about Kerbside Collection:

#### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 1\* - Streetscape revitalisation for Marton

#### **Comments on upgrading Marton Main Street:**

#### **Further comments:**

This is being signed off by Bethany Sellwood, Head of Sport at Nga Tawa Diocesan School and Sports Committee Representative.

**Comments about Kerbside Collection:** 

#### **Key Choice 3**

Should we revitalise the Marton Town Centre?

Comments on upgrading Marton Main Street:

#### **Further comments:**

The Bulls & Districts Historical Society have leased the former Grade 1 Heritage listed Bulls Library Building from the Council for 35 years to convert the building into a dedicated World War 1 Memorial to be known as the Bulls Commemorative Centre. The building has been earthquake strengthened to 67% of the NBS and the exterior painted free of charge by a local Bulls painter. On inspection, the roof needs replacing as advised in the two attached quotes together with photos showing the condition of the roof. On completion of the roof replacement the Society can continue with the sourcing of funding to complete the project.

The Society request the Council to purchase the required materials and we will undertake the installation of the new roof as a Community project.

# LTP 2024-2034 - Submission Form

Name/Ingoa: Carol Coleman Organisation/Toputanga (if applicable): Nga Tawa School **Key Choice 1** Should we open the Marton pool all year round? Option 2 - From 2024/25 the Marton pool would be open all year round. **Comments about opening the Marton Pool:** It would be well patronized by the Nga Tawa community. **Key Choice 2** How do you want to roll out the kerbside collection requirements? Comments about Kerbside Collection: **Key Choice 3** Should we revitalise the Marton Town Centre? **Comments on upgrading Marton Main Street: Further comments: Attachments:** 

# LTP 2024-2034 - Submission Form

Name/Ingoa: Charissa Lawlor

Organisation/Topūtanga (if applicable):

### Address/Käinga noho:

10 Wilson Road Hunterville

### Email/Īmēra:

charissalawlor@gmail.com

### Phone/Waea:

0278264336

# **Key Choice 1**

### Should we open the Marton pool all year round?

Option 2 - From 2024/25 the Marton pool would be open all year round.

### Comments about opening the Marton Pool:

- 1. Support local employment between Rangitīkei pools. Hunterville closed in March, lifeguards qualifications last 2 years this is only 6 months of actual employment extending Marton through winter would allow opportunity for Hunterville employees to continue year round employment.
- 2. Promote water safety, there are many drownings in NZ. Our family has benefited from lesson provided by Marton and that continuing in the Rangitīkei region would be beneficial to many families who may not be able to travel out of the area 35 minutes for us to Feilding.
- 3. It is the only 50m indoor Olympic size pool in our immediate area, closet being Wellington. This should be better promoted.
- 4. CLM have done a great job with managing the Taihape and Marton pools over the summer period and also with their offer of support for Hunterville and what we have tried to achieve within the season.

# **Key Choice 2**

#### How do you want to roll out the kerbside collection requirements?

Option 2 - We use staggered approach and rollout the bins one at a time over the prescribed time period.

### **Comments about Kerbside Collection:**

Staggering I see less of an initial rates increase and it allows for communities of regions to adjust/ come to terms with processes being implemented. It also means less debt to council albeit small, I think a much smarter choice considering it is something that needs to happen. Feilding does it well.

Open to seeing it rolled out at once on 2027.

# **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

### **Comments on upgrading Marton Main Street:**

I strongly disagree with the amount proposed to revitalise Marton Main Street. I question whether the Marton Community Committee or Marton Development Trust should in fact be coordinating this. The same way Hunterville does and continue to do so with ways of beautifying our community. \$2mil is an excessive amount especially considering this does not include the buildings which are in desperate need of attention.

#### **Further comments:**

Hunterville- What is in the long term plan for Hunterville. Our community committee works hard to always work to make Hunterville beautiful. We've painted seating, created new queens park signs paid for my the lions - we'd love to see more considering we are on the main road along with Taihape. Our community is driven to simply get things done.

I do question the average percentage of rates increase, the cost of living is skyrocketing, communities are struggling with just the basics, it is unfortunate to think our rates need to increase so much to provide for such things as the Marton Main Street upgrade but the Marton pool as a community asset is preferred by council to close over the winter months.

I would love to see the basics from council being done well.

I understand it is hard and time consuming to put together a plan of this size and congratulate the council on a well documented plan which has been easy to read and somewhat understand.

RD<sub>2</sub>

we are transforming the use of our town buildings and this is a gradual process I realise their is legislation driving change but this too may change.haste may reduce opportunities.

### **Further comments:**

I have concerns about the incidence and use of the general rate- in a district with uniform geography and land valuation this is not an issue but Rangitikei does not fit this model.

I was on council when the Taihape Town Hall was reconfigured in a major upgrade and the associated cost over runs and remedies required

Many people struggle to get to the recycling centre. It's hours are limited. It's unfortunate that recycling isn't more readily available now.

### **Key Choice 3**

#### Should we revitalise the Marton Town Centre?

Option 2 - Status Quo - Do not invest in streetscape revitalisation for Marton.

### **Comments on upgrading Marton Main Street:**

Apart from the obvious...ie...cleaning the streets, I would not like to see Marton end up looking like alot of other towns. It has it's own character. I think that the corner buildings owned by Council could be put to better use...car parking, which is pretty limited around town.Village green appears to be a good thing. Just needs to be enhanced...trees, picnic tables or seating. I would like to see monthly markets, food trucks to further generate use of this space.

### **Attachments:**

Taihape Netball Centre - LTP submission.pdf, 0.1MB

### Speak to submission:

I would like to speak to my submission.

5 April 2024

### Introduction

Taihape Netball Centre runs its competition at the Rangitikei District Council's courts in Taihape. There are approximately 300 participants across all age-groups as players, coaches, and umpires using the courts from April to September each year. With a new committee and President in place from February 2024, we are initiating several new programmes and an enhanced competition. We are targeting a 30% increase in participation across all age-groups, particularly juniors.

The key issue in this submission is that the netball courts are unsafe and not fit-for-purpose.

### Background

The Council will be aware that there has been a recent resurfacing project at the courts in Taihape which laid a new Plexipave surface. The total cost was \$89,251.27 (inc GST), comprising \$68,672.31 for the Plexipave and \$20,578.96 for the concrete works for the tennis and netball post holes. Taihape Netball and Tennis Taihape shared this cost equally, with Netball contributing its own funds and a partial contribution from a funding agency, and Tennis using a Council grant.

On its face, this presents a better surface for netball and tennis players and we are grateful for the support we have received.

However, there are fundamental, underlying problems with the courts which are longstanding and which were not addressed in this recent project.

The courts have flooded for years, and there has been extensive correspondence between Taihape Netball and the Council about the drainage and flooding. The flooding occurs due to the level of the ground which slopes down from each end of the courts to the middle, and runs through the centre of all courts from the squash building to the Ngã Awa block. There is a stormwater drain under the ground running between these two buildings.

The Council coordinated and project managed the resurfacing works, seeking quotes from contractors, assessing the options, and communicating with Tennis and Netball.

Prior to the resurfacing works, the Council said that it would address the stormwater drain problem. Taihape Netball understood that the stormwater drain would be relocated (like other renovations of courts around New Zealand) so that it did not run through the courts but was located outside the court area – eg, between the courts and the rugby fields. However, this did not occur. Instead, the Council arranged for the stormwater drain to be repaired by inserting a new sleeve inside it.

Then, during the resurfacing works, the stormwater drain was struck by the concrete contractor engaged to dig the new tennis poles. This meant that expensive repairs were required to the stormwater drain. As part of the repair work, the contractor inserted several new drain sumps and drain covers in the mid-court of each netball court, with the approval of the Council. While this did not materially impact tennis (being under the nets), they presented a very serious safety hazard for

netball players as the drain holes are below the surface of the Plexipave, and the drain covers are a different metal surface and slippery when wet. It was impossible for us to allow our players to play on the courts with these drains and covers in place as the risk of injuries was unacceptable.

A temporary fix has been agreed between the Council, Tennis and Netball to lift the drains and cover them with Plexipave. However, recent rainfall has shown that the flooding in the middle of the courts is still a problem, notwithstanding the re-surfacing and drain repair works. It is also apparent that the new Plexipave surface will wear much quicker than it should because the underlying asphalt is uneven, contains cracks, is often wet, and is overall in a very poor condition. Cracks and lumps in the Plexipave are already apparent without any netball games yet being played. In short, the courts are unsafe and not fit-for-purpose for netballers.

Furthermore, Netball and Tennis paid for the stormwater drain repairs, on top of the costs of digging the holes which was a significant increase from the original quote. The Council has declined to contribute notwithstanding it knew it was likely that the stormwater drain would be struck by the contractor when the poles were dug prior to the Plexipave resurfacing.

At the heart of all these issues is that the cause of the problems has not been addressed – ie, the level and condition of the asphalt and the location of the stormwater drain.

To add to the problems, there is a "nib" between the Plexipave surface and the concrete along the fence line to the fields which is likely to cause injuries to netballers. A tennis player has already incurred an injury on this nib. The concrete surface should have been removed so that the Plexipave could extend to a safe distance around the outside of the courts.

In several respects, the re-surfaced courts do not comply with Netball New Zealand's Specifications for the renovation of courts, designed for Councils and Netball Centres. The main issues are the drainage, the levels, and the court markings (the latter not being spaced correctly). Taihape Netball accepts that it is responsible for the errors in the court markings and will have to fund the repainting and re-marking of the court lines.

However, we also consider that the Council, having managed the project and being the owners of the courts, had a responsibility to ensure that the project would result in courts that were fit-for-purpose and safe for all users, and that the Specifications would be met.

### Request to Council in LTP

Taihape Netball requests that the Council allocate funds in the LTP for the relocation of the stormwater drain to outside the courts area, and the relevelling and relaying of the asphalt, in accordance with the Specifications. The courts will then need to be resurfaced with Plexipave and remarked. This will provide a long term solution which will address the issues set out above.

It is estimated that the costs of the stormwater works, relevelling, and asphalting (not including the Plexipave and line-marking) would be \$200,000 to \$300,000.

Taihape Netball requests the opportunity to speak to this submission. Thank you.

Mary Haggie President, on behalf of Taihape Netball Centre – Te Pokapū Poitarawhiti o Taihape
