

Risk and Assurance Committee - Rangitīkei District Council - Chair's Report - 6 December 2023

Author: Philip Jones, Chair

While not on the agenda, I would like to highlight the significant risks around the 2024 Long Term plan. These risks include but are not limited to:

- Uncertainty regarding the future of “Three waters” reforms and the impacts for Council and the community.
- Impact of climate change and weather events and the expectation of the Council's response.
- Inflation and the impact on renewing/building infrastructure.
- Increasing accounting and auditing standards, which adds to the complexities of the documents.
- Availability of appropriately skilled resources including experienced Auditors.
