

Marton is the largest town in the Rangitīkei, with a rapidly growing population. It is an historic rural town with a vibrant community spirit.

Situated off the State Highway network, Marton provides an affordable small-town lifestyle.

Marton has many opportunities associated with a growing population, its location in the Central North Island and access to both road and rail.

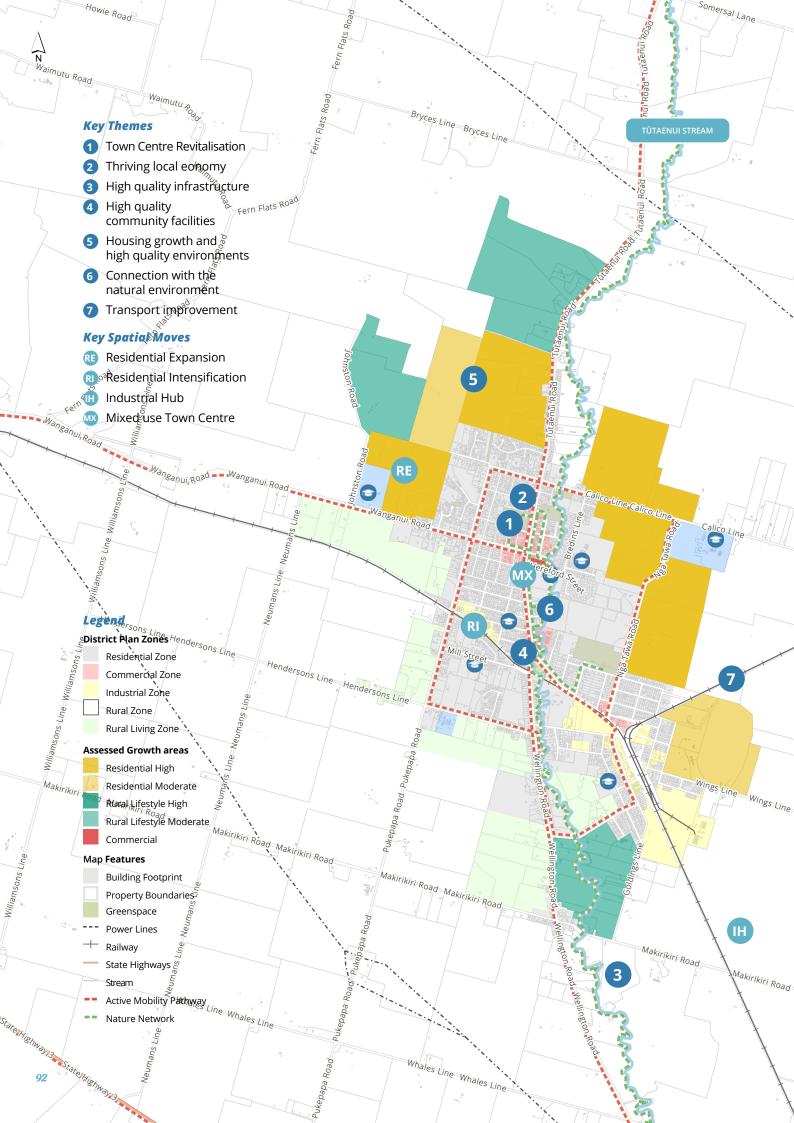

Marton is a vibrant town, a great place to live, with a variety of housing, great tasting water and an attractive town centre and thriving local economy.

Key community priorities

- Improvements to Marton's drinking water.
- Town centre revitalisation.
- Ensure infrastructure can cope with growth.

Marton at a glance **5,520** people call Marton home. Median age of **44**. The biggest age group is **† 30–64** years (40%). people per year (1.3% p.a) have moved to Marton since 2014. 76% of the population is European, †**24%** Māori and **†10%** Pasifika. Note: Where a person reported more than one ethnic group they are counted in each group. **2,256** houses in Marton. However at the last census 204 were unoccupied. The town's GDP This grew is valued at in 2020 businesses in Marton. jobs – more than half of which are in education, training, manufacturing or retail.

Town Centre revitalisation

The Marton Town Centre is currently run-down and lacking vibrancy. Commercial activities are spread along Broadway and to a lesser extent, Wellington Road and High Street.

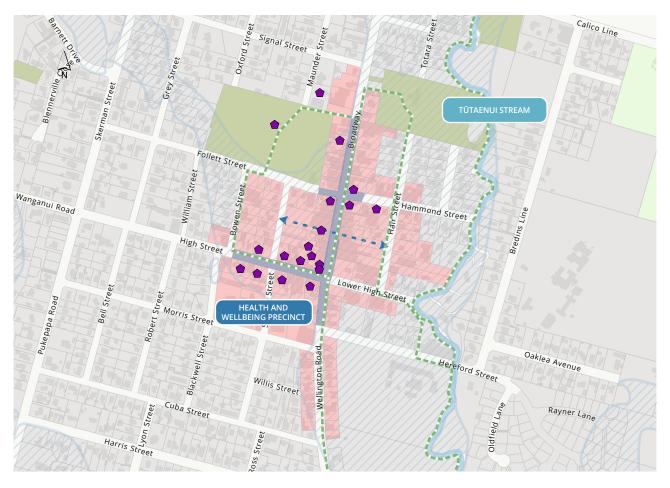

Marton has the potential to become one of the region's most desirable boutique towns by leveraging off its heritage buildings as a unique point of difference. The heritage buildings reflect Marton's strong and proud identity and, if challenges associated with funding their retention are able to be overcome, their adaptive reuse represents a key asset for the Marton town centre.

Strengthening earthquake-prone buildings, supporting mixed use activity and streetscape redevelopment that improves the pedestrian experience are needed to support the redevelopment of the Marton Town Centre as the heart of the community. To ensure vibrancy of the Town Centre, retail and community activities need to be concentrated in the commercial area around Broadway.

The increasing number of people working from home, and digital connectivity provides the opportunity for the development of a cowork space in Marton.

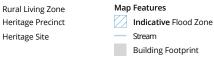

"I would like to see the town centre totally pedestrianised with a range of shops providing choice and opportunity not to have to travel out of Marton for the basics."

LEGEND

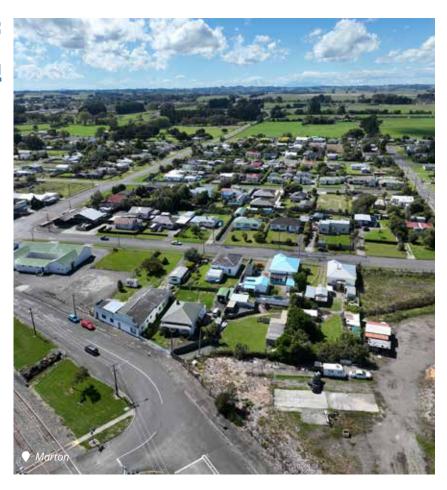

Priorities

- Position Marton as a boutique town, using the heritage precinct as a key asset/point of difference as a weekend visitor destination, and contributing to what makes Marton unique.
- > Investigate opportunities for streetscape redevelopment to create a shared environment where cars, pedestrians, cyclists, mobility scooters and other forms of mobility co-exist.
- > Develop the green space as an integral part of the town centre, linking the wider Marton town centre with the Tūtaenui Stream and town's green spaces through the development of nature networks.
- > Invest in the upgrade of the public realm to create a vibrant, attractive, comfortable, safe & accessible place for people of all ages & abilities.
- > Support the strengthening of earthquake-prone buildings and the establishment of new businesses.
- > Facilitate the establishment of a range of businesses –to support the Marton Town Centre as the vibrant heart of the community a space the community is proud of, has a variety of uses where our community can access a range of services and connect with each other.
- > Enable mixed use within the town centre to facilitate the intensification of uses and vibrancy of the area retail and offices on ground floor with residential above.
- > Support the establishment and growth of services and programmes in the health and wellbeing precinct in delivering comprehensive health and wellbeing services for the community.
- > Celebrate local art in public places.

"Redeveloped into a leafy traffic free zone with squares and alleys. Cafes and shops on ground floor with residential accommodation and professional offices above."

Community Voice

Thriving local economy

Marton's location in the Central North Island, near both rail and road networks provides significant opportunities for business expansion and establishment.

The long history of food production in the surrounding area that is only increasing due to our highly productive land, creates opportunities for Marton to grow the manufacturing sector.

The rezoning of land from Rural to Industrial is underway to support the development of a Rail Hub for Marton. The Marton Rail Hub aims to become a key logistical hub for the forestry industry across the Lower North Island. The rezoning is currently awaiting a decision from the Environment Court.

Theme 1 identifies the opportunities for the Marton Town Centre.

Priorities

- > Use Marton's location near the state highway and rail networks to position Marton as an industrial powerhouse for manufacturing and forestry processing.
- > Take a facilitative approach to the establishment of new businesses.
- Invest in town centre revitalisation.
- > Ensure there is sufficient land development-ready (zoned and serviced) to meet business growth needs.

Commercial growth

We anticipate needing an additional 0.7 hectares of land for commercial/retail purposes to meet future growth.

Providing for future commercial growth is challenging, because the land surrounding the town centre is already developed. However, the block between Lower High Street and Hereford Street has been identified as a potential future commercial growth area. This block is in close proximity to the town centre, already contains a range of community activities and has potential for redevelopment over the long term.

Industrial growth

Marton is already home to significant industrial businesses which are important to retain and grow.

lust over 29 hectares of land is zoned for future industrial use, however some of this land is

impacted by flooding. Based on past industrial activity, we do not anticipate needing additional land.

Property Boundaries

Demand will need to be monitored to ensure opportunities for business establishment and expansion for Marton are not constrained by land supply. The surplus of industrial land identified for Marton is also held in limited ownership, meaning if landowners are not willing to sell or develop the land for industrial purposes, the actual supply of industrial land will be significantly less.

	Commercial	Industrial
Projected demand	2.0 hectares	9.4 hectares
Expected Capacity (already zoned)	1.3 hectares	29.7 hectares
♣ ♣ Land required	0.7 hectares	-20.3 hectares

High quality infrastructure

As the community grows, the provision of infrastructure needs to meet increasing demand.

Council is already underway with key infrastructure projects to meet future growth demands including the implementation of the Marton Water Strategy and Marton to Bulls Wastewater Centralisation project.

Priorities

- > Invest in improvements to Marton's water supply to provide water that looks, tastes and smells great all year round.
- > Ensure the three waters network is upgraded to support residential, commercial and industrial growth.
- Work collaboratively with infrastructure providers to plan for future demand.

"The water is a real issue, it smells and tastes terrible. It needs to be addressed."

High quality community facilities

Marton has a range of community facilities – parks and reserves, halls, the library and Council administration building.

High quality community facilities can attract and retain residents and support community connection and wellbeing. Council is currently working on a business case for the Marton Civic Centre project which proposes to co-locate the main administration building and library.

There is strong community leadership in the development of our parks and reserves, which will be guided by the Parks, Reserves, Open Spaces and Sporting Facilities Strategy.

The opening of the pool year-round has been investigated and shown to not be feasible. Re-assessment of the feasibility will be a long term action, and may change as a result of population growth. However, in the long term there are potential redevelopment opportunities for the Marton Swim Centre.

Marton has two high schools and seven primary schools. There is capacity within the schools to meet growth projections.

Priorities

- Identify opportunities to improve the recreation opportunities associated with the Marton Swim Centre.
- Investment in Marton's civic facilities library and administration buildings.
- > Support community-led development of open spaces aligned with the Parks, Open Spaces and Sporting Facilities Strategy.

"Outdoor pool and slide and more opportunities for swimming classes. A place to hold kids birthday parties."

Housing growth and high quality built environment

Marton is projected to have high housing growth, and we need to ensure a range of housing is available.

The opportunity exists for Marton to create a high quality built environment and remain accessible by being strategic about future growth areas, ensuring connection with new developments, avoiding the flood hazard and improving active mobility networks and infrastructure that supports active choices.

Priorities

- Design future growth areas and redevelop the existing urban area so that people are able to access services and amenities (shops, health services, parks, schools) within 10 minutes of active travel.
- > Enable a diversity of well-designed housing that is high quality, low maintenance, a range of sizes, close to town, and provide a high level of amenity. This includes medium density housing, multi-generational housing, lifestyle blocks and retirement housing.
- Avoid housing development in areas at significant risk of flooding and increase resilience in areas already at risk.
- Connect the community via roads and pedestrian links.

"A mix of housing options but a focus on building quality neighbourhood"

Residential and lifestyle growth

Marton currently has approximately 2,256 dwellings (2018).

We expect strong residential growth to continue in Marton due to its commutable location to Whanganui and Palmerston North and future business growth.

We anticipate we will need an additional 61 houses per year, or an additional 1,761 homes by 2050. This growth will need to be supported by a vibrant town centre, and community and recreation facilities.

We already have some land available for new housing but may need up to an additional 98 hectares of Residential land to meet the demand.

	Residential	Rural Lifestyle	Total
Number of houses – per year	58 houses	3 houses	61 houses
Number of houses - by 2050	1,673 houses	88 houses	1,761 houses
Additional land required	98 hectares	0 hectares	98 hectares

Marton's flat topography facilitates a wide range of options for future greenfield development. However, not all areas have the same suitability for development. Key challenges include flooding, highly productive land and accessibility.

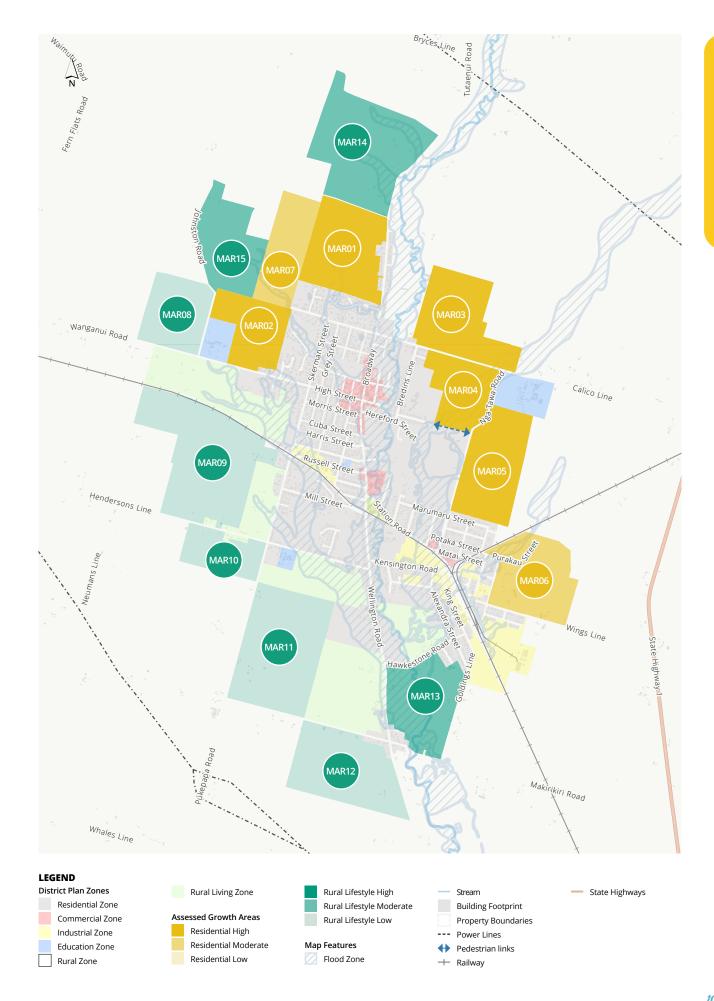

A range of potential growth areas were assessed to determine their suitability for future development. The areas have been assessed as follows:

Area	Size	Suitability rating
MAR01	64.2 hectares	High
MAR02	41.8 hectares	High
MAR03	62.7 hectares	High
MAR04	38.7 hectares	High
MAR05	62.3 hectares	High
MAR06	60.2 hectares	Moderate
MAR07	43.8 hectares	Moderate
MAR08	43.6 hectares	Low
MAR09	109.2 hectares	Low
MAR10	30.3 hectares	Low
MAR11	95.1 hectares	Low
MAR12	73 hectares	Low
MAR13	57.5 hectares	Moderate
MAR14	97.2 hectares	Moderate
MAR15	52.4 hectares	Moderate

Note: There may also be smaller properties on the fringe of the current Residential zone which may be appropriate for rezoning. These will be assessed through a District Plan change process. Further work, including technical assessment, will be completed to refine the assessment of future growth areas, which may change this prioritisation. A detailed assessment of the growth areas is provided in Section 3.

There were mixed views in the community around higher density development and infill housing, although a diversity of housing options was identified as being important. There was an openness for medium density housing, with the two most common views being its establishment within a 10-minute walk or throughout the whole town. Stand-alone, low maintenance houses close to town with a big backyard, including space for a garden were identified as desirable.

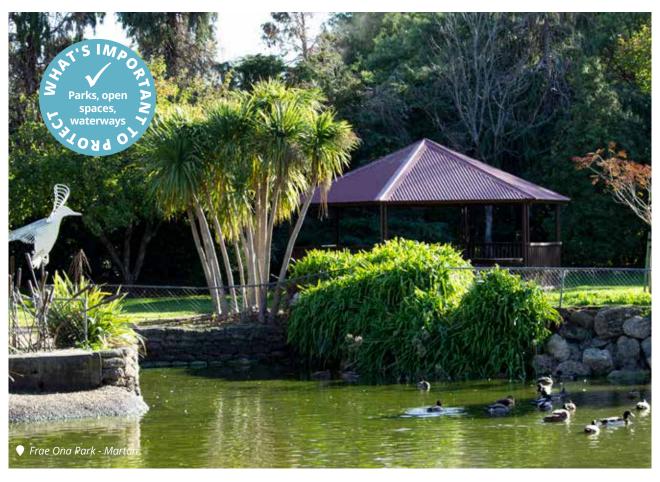

Connection with the natural environment

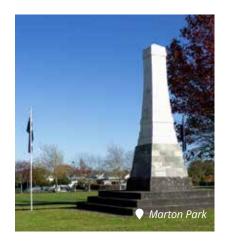

There is an opportunity to better connect Marton with the Tutaenui Stream which runs through the township and improve community health and amenity through the greening of the town.

This includes creating green connections between parks, the Tūtaenui Stream and through town, with more planting of trees and use of green infrastructure methods.

Priorities

- Celebrate the Tūtaenui Stream and encourage connection between the built environment and the waterway.
- Connect Marton's parks and reserves through the development of Nature Networks.
- Develop Marton's Town Centre as a core part of the town's nature networks, with opportunities for innovative green spaces such as green walls and roofs.
- > Identify opportunities for the use of green, low impact design, infrastructure.
- > Encourage an increase in the canopy cover for Marton.
- Include the use of trees and planting when developing active mobility pathways so that they form part of Marton's nature networks.

Transport improvements

Marton is located just off State Highway 1 and State Highway 3.

It is at the junction of the North Island Main Trunk Line and the Marton – New Plymouth Rail lines, however the last commuter service stopped in 2012.

The town is heavily reliant on private vehicles and there is significant opportunity to provide for the use of alternative transport options within the town. This can be achieved through the development of active mobility networks and the introduction of innovative public transport options.

Around 300 people travel to Marton for work, mostly from the surrounding rural environment (78), the Hunterville area (48) and to a lesser extent Bulls, Parewanui and Turakina (30-40 from each area).

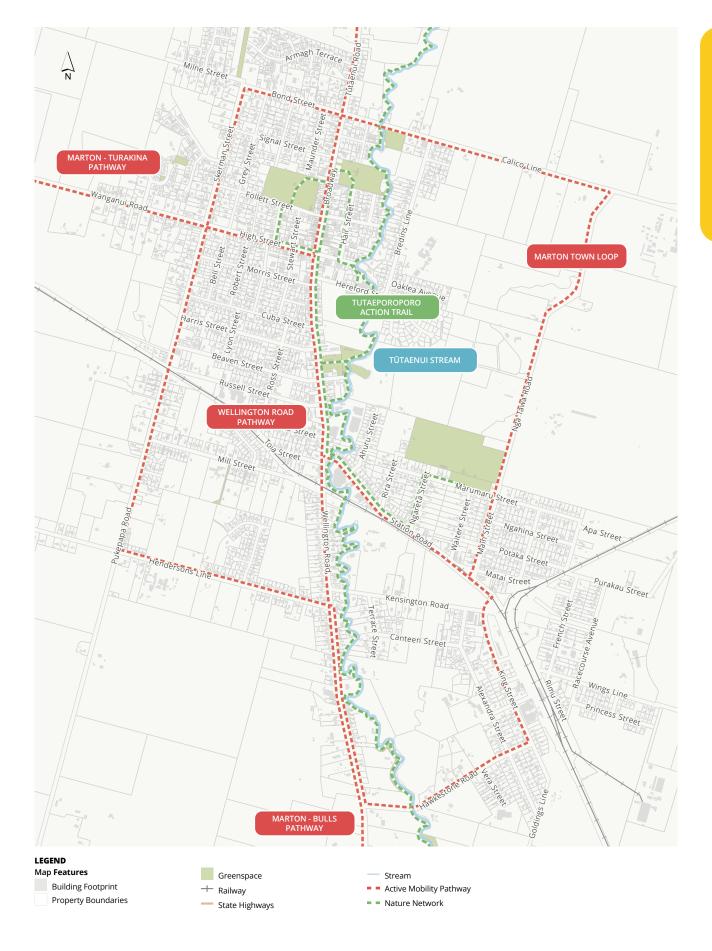

62% drive, 9% walk, 3% are a passenger and 1% cycle.

Around 530 people leave Marton for work. The top destination is the surrounding rural environment (183), Bulls (105) and commuter locations in Whanganui (60) and Palmerston North (81). Around 30 people head to the Ohakea-Sanson area, Parewanui and Feilding.

67% drive, 7% walk, 5% are a passenger in a vehicle and 1% cycle.1

Priorities

- > Develop active mobility pathways that support walking, cycling, e-scooters, mobility scooters and other forms of active mobility.
- Advocate for improved public transport options, particularly innovative shared transport solutions and better use of rail for commuters and tourists.

Action Plan

Rangitīkei Priority Area	Key Themes	Project			
			1.1	Implement streetscape improvements to increase vibrancy, improve the pedestrian experience, increase community connection, and provide linger opportunities (shelter, seating, photo opportunities, outdoor dining, public art).	
			1.2	Improve pedestrian connections between Broadway and Stewart Street/Hair Street.	
	NO		1.3	Investigate the implementation of incentives and/ or support for building owners to strengthen or redevelop earthquake-prone and heritage buildings.	
Thriving	FALISAT		1.4	Review the District Plan response to buildings in the Marton Heritage Precinct that are not listed, but contribute to the precinct.	
Communities Connected	REVII	1	1.5	Investigate the viability of the establishment of a cowork space in the Marton town centre.	
Communities Unique Communities	Z T R E		1.6	Develop a parking management strategy.	
Communicies	TOWN CENTRE REVITALISATION		1.7	Monitor demand for commercial land supply. Rezone future commercial growth area when required.	
			1.8	Implement wayfinding to connect the town centre with Te Ahuru Mowai, Marton Park, Centennial Park and the Tütaenui Stream.	
			1.9	Encourage retailers to engage with the footpath.	
			1.10	Invest in redevelopment of the village green to support community events and provide a green space for passive recreation in the town centre.	
			1.11	Implement storytelling throughout the town centre that shares the history of the area.	
	7	2	2.1	Monitor demand for future industrial land to ensure adequate supply.	
Thriving	THRIVING LOCAL ECONOMY		2.2	Invest in the development of the Marton Rail Hub.	
Communities	FCOI		2.3	Promote Marton as a key hub for food and forestry processing.	
	Ė		2.4	Facilitate the establishment and expansion of businesses in Marton.	
	111		3.1	Develop a stormwater management plan for Marton to guide future investment to increase stormwater resilience for Marton.	
Healthy Communities	HIGH QUALITY NFRASTRUCTURE	3	3.2	Implement the Marton to Bulls Wastewater Centralisation project to provide a long-term wastewater disposal system that can accommodate projected growth.	
Housing Growth	HIGH Q INFRASTR	HIGH Q	3.3	Implement the Marton Water Strategy to improve the amenity of Marton's water supply and provide capacity for growth.	
			3.4	Work alongside Horizons to investigate options for increasing Marton's resilience to flooding from the Tütaenui Stream, particularly for the Marton Town Centre.

Mataroa is a small settlement only 8 minutes north of Taihape.

The settlement became a railway village in the early 1900s when the Main Trunk railway line was laid and Mataroa Tunnel was constructed. The railway ceased in the 1960s.

The community has a primary school, local hall, cemetery and is next to the Paengaroa Scenic Reserve.

Key community priorities

- Retaining the settlement as it is now.
- Paengaroa Reserve and the Hautapu River.
- Keeping the school viable.

Retain the village feel

With around 20 houses in the settlement, there is a small area zoned for Residential use.

The settlement is located on land identified as Class 3 and is surrounded by Class 6 and 7.

There are younger generations from families who have lived in the area for a long time starting to return to Mataroa. The community identified a desire for the settlement to remain as it is now, with possibly a small increase in housing.

No significant residential growth is anticipated for the settlement, however, the zoning of the settlement should be reviewed.

No land is anticipated to be required for future business, outside of home-based businesses.

Priorities

> Retain Mataroa as a rural lifestyle village.

"Small, quiet and peaceful with a small population."

"I moved out here to get away from town."

"Keeping a school viable"

Community Voice

Community facilities and connection

Mataroa Hall and School are the heart of the community. Ensuring Mataroa School remains viable was identified as a challenge.

There is the potential for an active mobility link to be developed between Mataroa and Taihape, a loop around the Paengaroa Reserve and Taihape Golf Course, and improvements made to the path to Mataroa School. The Ohakune–Taihape Cycle Trail already runs through the village, the addition of an active mobility pathway would support increased use of the existing trail, plus increased local use for shorter recreation opportunities".

The ongoing management of the cemetery by the community is important.

Priorities

- Viability of Mataroa School.
- Local recreation opportunities Active mobility pathway development to support local and regional recreation opportunities and safety.
- > Community management of the Mataroa Cemetery

Natural environment

The Paengaroa Reserve and access to the Hautapu River were identified as important to protect for future generations.

Priorities

- > Community-led environmental restoration projects.
- > Access to the Paengaroa Reserve and Hautapu River.

"Paengaroa reserve is underutilised and under advertised"

Action Plan

Rangitīkei	Koy Thomas	Project			
Priority Area	Key Themes	Project			
Healthy Communities Unique Communities	RETAIN THE VILLAGE FEEL	1	1.1	Review the zoning of Mataroa village to recognise the area as a small rural village.

MOAWHANGO

Moawhango is one of the district's northernmost settlements located in a quiet valley on the Taihape-Napier Road, part of the tourism corridor with the Hawke's Bay.

The settlement has strong dual heritage that has two Ngati Whitikaupeka gazetted Marae – Moawhango Marae and Te Riu O Puanga Marae, as well as the Whitikaupeka Whare Karakia and Batley's Memorial Chapel.

The community supports the Moawhango School and the Moawhango Settlers Hall which service the surrounding rural community.

The settlement is currently zoned as Rural and has no reticulated services.

Moawhango remains a rural settlement, with a strong community based on intergenerational connectedness and people returning home.

Key Themes

- 1 Connection
- 2 Housing and jobs

Key Spatial Moves

Papakāinga

Legend

District Plan Zones

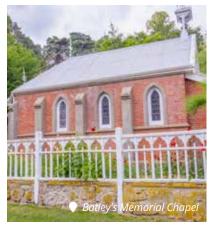

____ Rural Zone

Map Features

- Building Footprint
- Property Boundaries
- Green space
- River
- Nature Network

Connection

The community is strongly connected to the dual history, culture, and environment in the Moawhango area.

The local marae and hall are the heart of the community.

Locals are leading environmental enhancement projects associated with the Moawhango River.

Priorities

- > Recognise and celebrate local heritage.
- > Support community-led environmental restoration projects.

Moawhango

Housing and jobs

It is important to the community that local people stay in the area, and many who have left return home.

For this to occur local housing and jobs are needed.

Ngāti Whitikaupeka have long term aspirations for the development of papakāinga in the area.

Future businesses in the area are likely to leverage off the tourism sector and the location on the Taihape-Napier Road.

Moawhango also has strong connection to the job market in nearby Taihape.

Priorities

- Enable and facilitate the development of papakāinga by Ngāti Whitikaupeka.
- > Support the development and establishment of local tourism or primary production opportunities.
- Facilitate and encourage businesses in Taihape to provide jobs to those who wish to return home.

Action Plan

Ōhingaiti is in the middle of the Rangitīkei on a large terrace above the Rangitīkei River.

State Highway 1 and the Main Trunk Line run through the settlement.

Ōhingaiti has a community hall, the McIntyre Reserve and a local pub.

The Makohine Viaduct viewing area is located to the south of the settlement.

Key community priorities

- Town beautification.
- Growth opportunities.
- Community facilities.

S IMA

Safe community &

Ohingaiti is a green, safe and quiet little town, with a well-used town hall, café, pub and sports club.

"McIntyre Reserve is important. It hosts a fantastic event every year with the Ōhingaiti sports."

Community Voice

Recreation and community facilities

Ōhingaiti has close access to the Rangitīkei River.

McIntyre Reserve is the hub of recreation activities for the community. The community hall is not well-used, but has potential for becoming a key community asset.

Residents are concerned about the safety of the turn into Otara Road for people travelling north. This road is well used including by the Hunterville School bus as well as by people trying to access McIntyre Reserve.

Priorities

- > Support community-led management and development of the McIntyre Reserve.
- > Enabling the use and development of the community hall.
- > Connection with the Rangitīkei River.

Housing

Ōhingaiti has around 20 houses, with a small area zoned for Residential use. There are several vacant sections through the village.

The settlement and the surrounding environment is identified ass Class 2 land, with Class 6 hills located to the north.

There are no reticulated services.

The community has an openness for the development of more houses in the settlement. Antisocial behaviour and untidy/run-down sections were identified as challenges.

Ōhingaiti is not identified as a future residential growth area for the following reasons:

- The sites surrounding the settlement are on Class 2 soils and are part of large farming operations.
- There are no reticulated services available.
- There are vacant residential sections available for growth.

Priorities

- > Development of vacant sections.
- > Retaining the rural village lifestyle.

"More housing - also upgrading the run down houses that are sitting on land and not being used."

Business

Ōhingaiti has a pub and truck stop that is the heart of the community.

The settlement currently has a commercial zone. The extent of this zone needs to be reviewed to ensure the extent matches underlying land uses in the area.

Boutique accommodation, tourism and a trade hub were identified by the community as future business growth opportunities.

Priorities

- > Support local business development.
- > Enhancing town beautification and storytelling of local history.

Action Plan

	Rangitīkei Priority Area	Key Themes	Project			
				1.1	Support the community in the development of the McIntyre Reserve.	
	Healthy Communities	ON AND FACILITIES		1.2	Support community-led redevelopment of the community hall when it becomes a priority for the community.	
	Unique Communities	RECREATION AND COMMUNITY FACILITIES	1	1.3	Improve the connection between Ōhingaiti and the Rangitīkei River by the development of a green corridor between the settlement and the River.	
				1.4	Advocate for the installation of a right hand turning bay for Otara Road, Ōhingaiti.	
\	Healthy Communities	HOUSING	2	2.1	Review the zoning of Ōhingaiti to recognise the area as a rural village.	
\\\\///	Thriving Communities	BUSINESS	3	3.1	Investigate the appropriateness of the extent of the commercial zone to ensure properties that are commercial in nature are zoned correctly.	
				3.2	Support community-led beautification and storytelling initiatives

Ōhotu is a small lifestyle settlement, just off State Highway 1, north of Utiku.

The Hautapu River runs to the west of the settlement which has around ten houses.

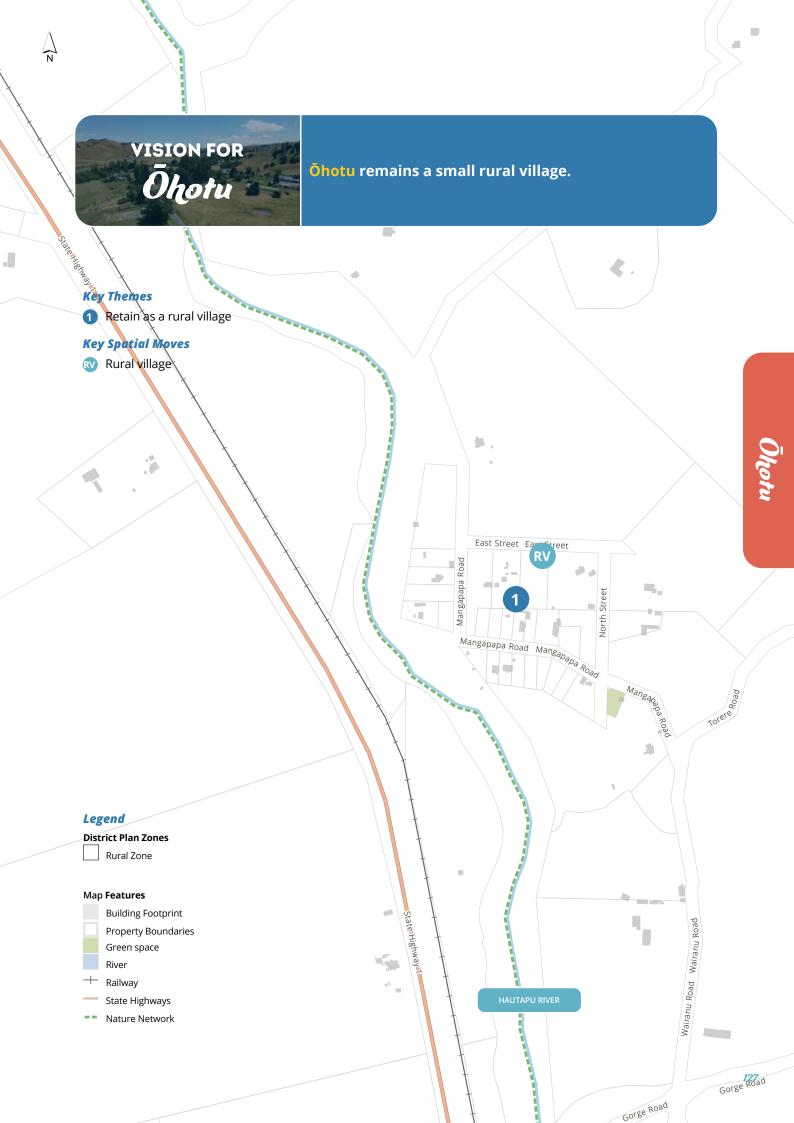

The village was originally surveyed in 1869 as Torere Village, and became known as Ōhotu in the 1920's.

The area previously had access to the Ōhotu railway station, located across the Hautapu River, which closed in 1959.

The settlement has a community hall which is not well used.

Retain as a rural village

 $\bar{\text{O}}\text{hotu}$ is a small rural village located on a strip of Class 2 land that runs along the Hautapu River.

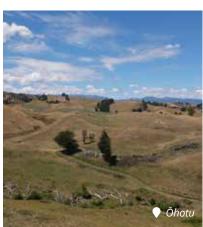

The area has no reticulated services and is currently zoned as Rural.

The village has a community hall which is not well used, but has the potential to become a community hub.

No significant residential or lifestyle growth is anticipated for the settlement.

> Retain Ōhotu as a rural lifestyle village.

Action Plan

The actions identified in the Action Plan are not guaranteed to be developed. Council will consider which actions are developed through long term planning processes and collaboration with implementation partners.

OPAEA / KAIEWE

The Ngāti Tamakōpiri rohe extends from north of Taihape through to the east of Ruapehu, with some areas core Tamakōpiri rohe, and others shared with Ngāti Whitikaupeka and in the north west some shared areas with Ngāti Rangi.

Opaea marae was a historic stop for iwi travelling through the Central North Island. It sits between two major lands of the rohe of Ngāti Tamakōpiri – the Awarua and Motukawa blocks.

Historically given the location on key routes through the North Island, the Ngāti Tamakōpiri people were often caught up in confrontations and some hapū groups moved as was common practice at those times for safety or to strengthen other Iwi alliances to areas outside of the Tamakōpiri rohe. In particular, regular movement occured between Taihape and Turangi. This migration means the Waiouru Military area is also an area of significance for Ngāti Tamakopiri for this area provided the paths for travel, hunting and gathering to sustain Ngāti Tamakōpiri people.

Ngāti Tamakōpiri is currently going through Treaty Settlement claims as part of Mokai Patea Nui Tonu, which is a key focus as part of ensuring long term wellbeing.
