Subject: Hunterville fire Station SR 1802363

Hello Sheryl

I have inspected the Old Fire Station Building in Bruce street Hunterville together with the pile of debris on the ground at the rear of the building.

Firstly, the pile of rubbish at the rear of the building contains Asbestos and is required to be removed by a registered Asbestos remover. (which we can arrange)

Looking at the building it also contains several products that contain Asbestos which must be removed in the same manner.

In my opinion the best option for Council would be to have the building demolished and all the asbestos removed at the same time.

The cost of demolishing the building including an Asbestos management plan and notification, the asbestos removal, independent clearance inspection and certificate, Traffic management plan and temporary site fencing is \$17,531.75 plus GST.

Please let me know if you require any further information.

Regards

Bryce Tasker
