# **CBEC CANDIDATE BIOS – ZONE 3**

#### **Marcus Buddo**

Marcus Buddo believes that Community Boards have a very important role to play in Local Government, one that will only get more critical over time. The intimate ties to communities that Community Board members have is an incredible asset to making considered and appropriate decisions around the Board and Council table.

Elected to the Hastings Rural Community Board in 2019 at age 24, Marcus has since successfully run for the Hastings District Council. He has degrees in Politics, Economics and Health Science, and has managed farming and forestry properties for the last five years.

Marcus' term on the Community Board was invaluable experience. The relationships he formed with Councillors, Board Members and Council Staff have stood him in good stead, while the knowledge of Local Government processes and language has enabled him to hit the ground running in his new role. Community Boards are a brilliant training place for Local Government politicians, and add vital insight and advocacy for communities that may not otherwise have their needs met.

Marcus would like to see Community Boards across the country better recognised and understood, both by the general public and their Councils. With changes coming to how Local Government functions, which services it delivers, and where decisions get made (Future Development Strategies etc.), Community Boards need to be positioned as an essential and effective part of local decision making. We need more competent, respected boards, which have the capability to take on more responsibilities. Marcus will be a strong advocate for the value Community Boards bring, and their role in shaping the future of our communities.

#### **Sarah Lucas**

I have a strong interest local government and how it can become more relevant to our communities. I have been keeping up to date into the current review of the future of local government, and see many areas that improvements could be made to bring local democratic processes closer to the people they represent.

Community Boards are unique. They provide real grassroots representation and have an important role to play in the decisions that get made in governance. Community Boards are not simply a left over relic from the 1989 reforms, but a real way for councils to understand and plan for the needs of diverse, localised communities. Each and every board needs to be strongly supported, and respected, so that it can do the important work of representation and advocacy.

We are in a time of huge change and reform, and I would relish the opportunity to use my skills in an advisory capacity to the Local Government New Zealand (LGNZ) National Council. I have a strong interest in researching best practice and using rationale clearly back by data and evidence. Thanks for your consideration for this important role.

#### 2. Lake Waipu Improvement and Ratana Wastewater Treatment Project

#### **Project Status**

This project has been a collaborative effort involving local iwi, RDC, HRC and the community of Ratana, and is partly funded (46%) by Ministry for the Environment (MfE). The project is to remove treated effluent from Lake Waipu and to dispose of it to land. The project started on 1 July 2018 with an agreement with the Ministry for the Environment (MfE) and has an estimated duration of 5 years. Construction will need to be completed by December 2023.

An application for a new consent was lodged in April 2018, and this application allows RDC to proceed under existing use rights with the current consent conditions to discharge treated wastewater into lake Waipu until such time as a new consent application for land disposal can be submitted.

The scope of this project includes purchase of land for disposing of treated wastewater (instead of discharge to Lake Waipu), the installation of irrigation equipment and an upgrade of the existing Rātana Pā wastewater treatment plant.

Actual construction costs can only be finalised once all detail has been specified or designed and the resource consent conditions are known. The costs are expected to be more than the current estimates when looking at cost escalation trends of the construction market in the last couple of years, however staff are evaluating all potential solutions to minimise (or eliminate) any budget overspend. |  |  |  |  |
