The Turakina Caledonian Society

Memorandum of Understanding

Background

The Turakina Caledonian Society (TCS) holds the annual Turakina Highland Games on the Turakina Reserve and for some time has been struggling with the lack of storage space; as well as needing space for an office for 'on the day' scoring, photocopying and various other activities. Such an office needs to be resilient to adverse weather conditions; especially wind.

Proposal

The TCS proposes to place a converted re-locatable shipping container on the reserve. It will be placed in a central position, under the tree line on the back of the reserve. The container will have a window and single door facing out towards the existing covered shelter; as well as the standard container doors at the end. The container is at present painted in a 'forest green' colour; very close to the existing sheds colour but if agreeable it may be customised to reflect the Scottish origins of the Highland Games and to make it more visible to competitors.

The container will be the property of the Turakina Caledonian Society.

Some proposed Conditions:

- The TCS shall be responsible for all maintenance on the container.
- If the TCS was to be wound up the container would be removed at the expense of the TCS.
- If the Turakina Reserve was to come under the control of an organisation other than the Turakina Reserves Management Committee / Rangitikei District Council it is proposed this agreement would continue to stand.
- If the Turakina reserve was to pass into private hands the TCS will arrange the relocation / removal of the container.
